

# Fundamentals of Automobile Body Structure Design

## Contents:

### Chapter 1 - The Automobile Body ..... 1

1.1	Description of the Automobile Body Types.....	3
1.2	Body Nomenclature .....	5
1.3	Body Mass Benchmarking.....	10
1.4	The Body Structure as a System .....	11
1.5	Note on Design Philosophy .....	12

### Chapter 2 - Body Structural Requirements ..... 13

2.1	Categories of Structural Requirements.....	14
2.2	The Locate and Retain Function .....	17
2.3	Locate and Retain for Front Suspension Attachment Structure .....	20
2.4	Flow Down of Requirements from Vehicle-Level Functions .....	30

### Chapter 3 - Automotive Body Structural Elements ..... 35

3.1	Overview of Classical Beam Behavior.....	36
3.2	Design of Automotive Beam Sections.....	41
3.3	Torsion of Thin-Wall Members .....	50
3.4	Thin-Wall Beam Section Design in Automobiles .....	70
3.5	Buckling of Thin-Walled Members .....	77
3.6	Automobile Body Panels: Plates and Membranes.....	100
3.7	Summary: Automotive Structural Elements.....	116

### Chapter 4 - Design for Body Bending ..... 119

4.1	Body Bending Strength Requirement .....	120
4.2	Body Bending Stiffness Requirement .....	123
4.3	Internal Loads During Global Bending: Load Path Analysis.....	128
4.4	Analysis of Body Bending Stiffness .....	135
4.5	Principles of Good Joint Design .....	147

### Chapter 5 - Design for Body Torsion ..... 161

5.1	Body Torsion Strength Requirement.....	162
5.2	Body Torsion Stiffness Requirement .....	163
5.3	Internal Loads During Global Torsion: Load Path Analysis .....	167
5.4	Analysis of Body Torsional Stiffness.....	178
5.5	Torsional Stiffness of Convertibles and Framed Vehicles.....	192

### Chapter 6 - Design for Crashworthiness ..... 209

6.1	Standardized Safety Test Conditions and Requirements.....	210
-----	---	-----

# **Fundamentals of Automobile Body Structure Design**

6.2	Front Barrier .....	211
6.3	Side Impact .....	236
6.4	Note on Rear Impact .....	245
6.5	Note on Roof Crush.....	247
<b>Chapter 7 - Design for Vibration .....</b>		<b>251</b>
7.1	First-Order Vibration Modeling .....	252
7.2	Source-Path-Receiver Models of Vibration Systems.....	256
7.3	Frequency Response of a Single-Degree-of-Freedom System.....	260
7.4	SDOF Models of Vehicle Vibration Systems .....	266
7.5	Strategies for Design for Vibration.....	281
7.6	Body Structure Vibration Testing .....	283
7.7	Modeling the Body Structure Resonant Behavior.....	285
7.8	Vibration at Frequencies Above the Primary Structure Modes .....	290
7.9	Note on Use of Rotating Phasors to Solve Damped Vibration Problems.....	306
7.10	Note on Mechanical Impedance Technique.....	308
<b>Chapter 8 - Design for Vehicle and Styling Integration.....</b>		<b>313</b>
8.1	Designing the Best Body Structure.....	314
8.2	Vehicle Layout.....	314
8.3	Exterior Body Surface .....	326
8.4	Constraints on Body Structure from Vehicle Layout and Exterior Surface.....	331
8.5	Body Structure Topology .....	334
8.6	Load Path Design at Suspension Attachments.....	339
8.7	Summary.....	348
<b>Chapter 9 - Material Selection and Mass Estimation in Preliminary Design .....</b>		<b>351</b>
9.1	Materials for the Body-in-White.....	352
9.2	Preliminary Mass Analysis.....	368
<b>Appendices.....</b>		<b>381</b>
A.	Exercises.....	381
B.	Nomenclature.....	431
C.	English & Metric Units & Typical Values for Key Parameters.....	435
