

Table of Contents

Preface..... **xiii**

Chapter 1 Introduction: Outlook for Energy and Transport Fuels **1**

1.1 Global Energy Demand2

1.2 Global Energy Resources and Supply6

 1.2.1 Fossil Fuels.....6

 1.2.2 Renewable Energy.....12

 1.2.3 Nuclear Energy13

 1.2.4 Efficiency Improvements14

1.3 Transport Energy and Transport Fuels14

 1.3.1 Conventional Transport Fuels14

 1.3.2 Alternative Transport Energy Sources18

 1.3.2.1 Biofuels.....18

 1.3.2.2 Gas to Liquids20

 1.3.2.3 Other Alternative Fuels21

 1.3.3 Electrification.....22

1.4 Summary and Concluding Remarks25

1.5 References.....26

Chapter 2 Manufacture, Composition, and Properties of Practical Fuels for Internal Combustion Engines **33**

2.1 Manufacture and Composition of Practical Fuels35

2.2 Fuel Composition and Properties and Their Effects on Engine Performance and Emissions41

 2.2.1 Gasoline42

 2.2.1.1 Gasoline Antiknock Properties.....42

 2.2.1.2 Volatility.....43

 2.2.1.3 Density45

 2.2.1.4 Gum Specifications.....45

 2.2.1.5 Aromatic Content45

 2.2.1.6 Olefin Content.....45

 2.2.1.7 Sulfur Content.....45

2.2.1.8	Oxygenates	46
2.2.1.9	Metal Content	47
2.2.2	Diesel Fuel	47
2.2.2.1	Autoignition Quality (Cetane)	47
2.2.2.2	Density and Viscosity	50
2.2.2.3	Distillation Properties	50
2.2.2.4	Lubricity	50
2.2.2.5	Cold Flow Properties	51
2.2.2.6	Flash Point	52
2.2.2.7	Sulfur	52
2.2.2.8	Aromatics	53
2.2.2.9	Biodiesel	53
2.3	Fuel Additives	53
2.3.1	Gasoline Performance Additives	54
2.3.1.1	Deposit Control Additives	54
2.3.1.2	Combustion Modifiers	54
2.3.1.3	Friction Modifiers	54
2.3.2	Diesel Performance Additives	55
2.3.2.1	Cetane Improvers	55
2.3.2.2	Detergent Additives	55
2.3.2.3	Cold Flow Performance Additives	55
2.3.2.4	Lubricity Additives	56
2.3.3	Storage- and Distribution-Related Additives	56
2.4	References	57

Chapter 3 Deposits in Internal Combustion Engines 63

3.1	The Nature and Formation of Deposits	68
3.1.1	Fuel Injector Deposits	69
3.1.1.1	Port Fuel Injector Deposits	69
3.1.1.2	Direct Injection Spark Ignition Injector Deposits	70
3.1.1.3	Diesel Injector Deposits	71
3.1.2	Intake System Deposits	72
3.1.3	Combustion Chamber Deposits	75
3.1.3.1	Growth of Combustion Chamber Deposits	76
3.1.3.2	Composition, Properties, and Structure of Combustion Chamber Deposits	78
3.2	Effects of Engine Deposits on Engine Performance and Emissions	81
3.2.1	Injector Deposit Effects	81
3.2.2	Intake Valve Deposits Effects	81
3.2.3	Combustion Chamber Deposit Effects	82
3.2.3.1	Octane Requirement Increase	83
3.2.3.2	Fuel Economy	84

3.2.3.3	Combustion Chamber Deposit Flaking and Associated Problems85
3.2.3.4	Emissions86
3.2.3.5	Combustion Chamber Deposit Interference or Carbon Rap88
3.2.3.6	Other Effects of Combustion Chamber Deposits88
3.3	Deposit Control89
3.4	Other Deposits of Concern in Internal Combustion Engines92
3.5	References93

Chapter 4 Fuel Effects on Autoignition in Premixed Systems—Knock in Spark Ignition Engines and Combustion in Homogeneous Charge Compression Ignition Engines 109

4.1	Autoignition110
4.1.1	Chemical Kinetics Modeling111
4.1.2	Ignition Delay and the Livengood-Wu Integral112
4.1.3	Autoignition Quality of Practical Fuels119
4.2	Knock in SI Engines and Fuel Antiknock Quality120
4.2.1	Knock Intensity and Knock-Limited Spark Advance121
4.2.2	Knock-Limited Performance122
4.2.3	Antiknock Quality of Practical Fuels—The Octane Index and the K Value123
4.2.4	Octane Requirement128
4.3	Fuel Effects on Homogeneous Charge Compression Ignition Combustion131
4.3.1	Understanding Fuel Effects in HCCI Engines within a Framework Based on the Octane Index132
4.3.1.1	Variation of CA ₅₀ with Octane Index135
4.3.1.2	Variation of K136
4.3.1.3	The Octane Requirement OI_0 of an HCCI Engine137
4.3.1.4	Limits of Operation139
4.3.1.5	Some Remarks about the Octane Index Approach140
4.3.2	Other Approaches to Characterizing Fuel Performance in HCCI Engines140
4.3.3	Fuel Requirements of HCCI Engines142
4.3.3.1	Idealized “Full HCCI” Scenario143
4.3.3.2	Practical Scenario144

4.4	Should There Be a New Test to Rate the Autoignition Quality of Fuels?	144
4.5	Summary and Concluding Remarks	148
4.6	References.	149

Chapter 5 Preignition and Super-Knock in Turbocharged Spark Ignition Engines 159

5.1	Preignition	162
5.1.1	Fulfillment of the Ignition Criterion.	162
5.1.1.1	Surface Ignition.	162
5.1.1.2	Ignition Away from Surfaces: Autoignitive Preignition	163
5.1.2	Fulfillment of the Initiation Criterion.	164
5.1.3	Methods Used for Quantifying Preignition	166
5.1.4	Pressure and Temperature Effects on Preignition	166
5.1.5	Mixture Strength Effects on Preignition.	167
5.1.6	Fuel Effects on Preignition.	168
5.2	Super-Knock.	171
5.3	Summary and Concluding Remarks	178
5.4	References.	179

Chapter 6 Fuel Effects on Compression Ignition Combustion—Is Low-Octane Gasoline the Best Fuel for Advanced Diesel Engines? 185

6.1	Premixed Compression Ignition	190
6.2	Fuel Effects in Diesel Engines Running on Fuels in the Conventional Diesel Autoignition Range	192
6.2.1	Heat Release and Noise	193
6.2.2	Engine-Operating Parameters, Combustion Phasing, and Emissions in Premixed Compression Ignition with Diesel Fuels	196
6.2.3	Higher Loads with Diesel Fuels	200
6.2.4	Summary on Compression Ignition Combustion with Diesel Fuels	202
6.3	Premixed Compression Ignition Combustion with Fuels with Long Ignition Delays	204
6.3.1	Low Loads	204
6.3.2	High Loads.	207
6.3.3	Effects of Gasoline Fuel Properties on Premixed Compression Ignition Combustion	213

6.3.4	Effects of Injection Pressure, Injection Strategies, and Injector Design on Gasoline Premixed Compression Ignition	217
6.3.5	Dual-Fuel Operation or Reactivity Controlled Compression Ignition	220
6.3.6	Full Load Operation on Gasoline Compression Ignition . . .	221
6.3.7	Fuel Efficiency with Gasoline Compression Ignition	221
6.3.8	Modeling Gasoline Premixed Compression Ignition	222
6.4	Summary and Concluding Remarks	222
6.5	References	226
Chapter 7 Implications for Future Transport Fuels		235
7.1	Fuel Implications of Spark Ignition Engine Development Trends	236
7.1.1	Specifications for Antiknock Quality	236
7.1.2	Other Fuel Specifications	238
7.2	Fuel Implications of Compression Ignition Engine Development Trends	239
7.3	Summary and Concluding Remarks	240
7.4	References	242
