

# Contents

<b>Preface</b> .....	xi
I.1 Approach.....	xi
I.2 Organization and Content .....	xi
Acknowledgment.....	xiii
<b>Chapter 1: Introduction to Automotive Product Engineering ...</b>	<b>1</b>
1.1 Vehicle Development Management .....	1
1.1.1 Product Engineering and Development .....	2
1.1.2 Engineering Change Management.....	6
1.1.3 Lifecycle Analysis in Development .....	11
1.1.4 PLM Principle and Applications .....	13
1.2 Architectures of Passenger Vehicles .....	16
1.2.1 Passenger Vehicle Overview .....	16
1.2.2 Vehicle Body Architectures .....	18
1.2.3 Sheet Metal Parts.....	23
1.3 Materials for Vehicle Body.....	25
1.3.1 Conventional and New Steels.....	26
1.3.2 Non-ferrous Metals.....	28
1.3.3 Nonmetallic Materials .....	30
1.3.4 Considerations in Material Selection.....	31
1.4 Exercises .....	39
1.4.1 Review Questions.....	39
1.4.2 Research Topics .....	40
References .....	40
<b>Chapter 2: Methodology of Assembly System Development ..</b>	<b>45</b>
2.1 System Development Procedure.....	45
2.1.1 Manufacturing Development .....	45
2.1.2 Development Standardization .....	51
2.2 Main Approaches for Development.....	53
2.2.1 Systems Engineering in Development.....	53
2.2.2 Design for Manufacturing.....	58
2.2.3 Lean Manufacturing.....	62
2.3 Project Management for Development .....	66

2.3.1	Project Management Overview .....	66
2.3.2	Alternative Selection.....	69
2.3.3	Project Planning .....	72
2.3.4	Project Execution.....	73
2.4	Challenges and Advance .....	76
2.4.1	System Intelligence.....	76
2.4.2	Virtual Development .....	77
2.4.3	Additive Manufacturing Technology.....	78
2.5	Exercises .....	81
2.5.1	Review Questions .....	81
2.5.2	Research Topics.....	81
	References .....	81
<b>Chapter 3: Analyses of New Manufacturing Systems .....</b>		<b>85</b>
3.1	System Reliability .....	85
3.1.1	Reliability Fundamentals.....	85
3.1.2	Analysis of Workstation Reliability .....	88
3.1.3	Analysis of Assembly Line Reliability .....	90
3.2	Manufacturing Flexibility .....	95
3.2.1	Overview of Manufacturing Flexibility.....	95
3.2.2	Challenges to Manufacturing Flexibility.....	97
3.2.3	Discussion on Assembly System Flexibility .....	98
3.2.4	Design for Manufacturing Flexibility .....	100
3.3	Other Capabilities of Assembly Systems.....	101
3.3.1	Cycle Time .....	101
3.3.2	Product Quality.....	104
3.3.3	System Throughput .....	106
3.4	Economic Analysis of Development .....	108
3.4.1	Economic Comparison of Alternatives .....	109
3.4.2	Assessment of New Manufacturing Systems .....	112
3.5	Exercises .....	117
3.5.1	Review Questions .....	117
3.5.2	Research Topics .....	118
3.5.3	Analysis Problems .....	118
	References .....	120
<b>Chapter 4: Design of Vehicle Assembly Systems .....</b>		<b>123</b>
4.1	Considerations in System Design.....	123
4.1.1	Requirements of Manufacturing System.....	123
4.1.2	Characteristics of Assembly Lines .....	130
4.2	Application of Hierarchical Modeling .....	136
4.2.1	Product Assembly Architecture .....	136
4.2.2	Overall Development Procedure .....	138
4.2.3	First Step: To Design System Flow .....	139

4.2.4	Second Step: To Configure Assembly Lines .....	143
4.2.5	Considerations in System Development .....	145
4.3	Development of System Layouts .....	150
4.3.1	Vehicle Assembly Layouts .....	151
4.3.2	Considerations in Layout Development .....	154
4.3.3	Dimensions of Assembly Systems .....	157
4.4	Exercises .....	161
4.4.1	Review Questions .....	161
4.4.2	Research Topics .....	162
	References .....	162
<b>Chapter 5: Process Planning for Vehicle Assembly .....</b>		<b>165</b>
5.1	Process Engineering for Vehicle Assembly .....	165
5.1.1	Assembly Process Planning Overview .....	166
5.1.2	Considerations in Process Planning .....	169
5.2	Process Planning of Workstations .....	172
5.2.1	Process Task Assignments .....	174
5.2.2	Operation Time Study .....	176
5.2.3	Efficiency of Manpower Utilization .....	180
5.3	Technical Focuses in Process Planning .....	184
5.3.1	Operation Balance .....	184
5.3.2	Process Robustness .....	188
5.3.3	Process Flexibility .....	191
5.4	Proactive Planning using FMEA .....	193
5.4.1	FMEA Principle .....	193
5.4.2	P-FMEA Development .....	196
5.4.3	M-FMEA Characteristics .....	200
5.5	Exercises .....	202
5.5.1	Review Questions .....	202
5.5.2	Research Topics .....	203
5.5.3	Analysis Problems .....	203
	References .....	205
<b>Chapter 6: Automatic and Manual Operations .....</b>		<b>207</b>
6.1	Manufacturing Automation .....	207
6.1.1	Automation Overview .....	207
6.1.2	Control Logic of Operations .....	212
6.1.3	Applications of Sensors .....	215
6.2	Robotic Applications .....	220
6.2.1	Industrial Robot Overview .....	220
6.2.2	Robots in Vehicle Assembly .....	224
6.2.3	Safety Considerations for Robotic Applications .....	228
6.2.4	Advance—Collaborative Robots .....	229
6.3	Considerations for Manual Operations .....	231

6.3.1	Characteristics of Manual Operations .....	231
6.3.2	Worker Safety Assurance .....	234
6.3.3	Ergonomic Considerations .....	237
6.4	Exercises .....	242
6.4.1	Review Questions .....	242
6.4.2	Research Topics .....	243
References	.....	243
 <b>Chapter 7: Design and Arrangement of Supportive Functions.....</b>		<b>245</b>
7.1	System Buffering .....	245
7.1.1	Buffers in Manufacturing Systems .....	245
7.1.2	Influences of Buffers on Throughput .....	247
7.1.3	Buffer Planning .....	249
7.2	Inbound Logistics .....	254
7.2.1	Delivery of Incoming Materials and Parts .....	255
7.2.2	Shipping Racks and Transportation .....	257
7.2.3	Part and WIP Tracking .....	259
7.2.4	Facilities Functionality .....	262
7.3	Part and WIP Transfer in Assembly Operations .....	263
7.3.1	Part Delivery Conveyors .....	263
7.3.2	Robotic Material Handling .....	264
7.3.3	Large Conveyance Systems .....	266
7.4	Build-in Quality Assurance .....	273
7.4.1	Quality Assurance Planning .....	273
7.4.2	Rework and Pull-off Functions .....	275
7.4.3	Cost Considerations in Quality Assurance .....	279
7.5	Exercises .....	281
7.5.1	Review Questions .....	281
7.5.2	Research Topics .....	282
References	.....	282
 <b>Chapter 8: Management of Tooling Development.....</b>		<b>285</b>
8.1	Assembly Tooling Development .....	285
8.1.1	Functionality of Assembly Tooling .....	285
8.1.2	Development of Special Tooling .....	287
8.1.3	Tooling Flexibility .....	292
8.2	PLP Principles and Applications .....	296
8.2.1	GD&T for Automotive Assembly .....	296
8.2.2	Part Locating Principles .....	298
8.2.3	Considerations for Locating Compliant Parts .....	300
8.3	Fixture Functional Design .....	306
8.3.1	Fixture Components and Units .....	306
8.3.2	Fixture Configurations .....	309

8.4	Fixture Dimensional Assurance .....	314
8.4.1	Principle and Procedure.....	314
8.4.2	Dimensional Accuracy Certification .....	315
8.4.3	Functional Repeatability Certification.....	318
8.5	Exercises .....	324
8.5.1	Review Questions.....	324
8.5.2	Research Topics .....	325
	References .....	325
	<b>About the Author</b> .....	<b>329</b>
	<b>Index</b> .....	<b>331</b>
