CHAPTER 1

Introduction to Composites and Care of Composite Parts	<u>1</u>
1.1 Definition of Composites	<u>1</u>
1.2 History of Composite Materials	<u>2</u>
1.3 Advantages and Disadvantages of Composites	<u>2</u>
1.3.1 Advantages of Composites	<u>3</u>
1.3.2 Disadvantages of Thermosetting Resin Composites	<u>3</u>
1.3.3 Advantages of Thermosetting Resin Composites	<u>3</u>
1.3.4 Advantages of Thermoplastic Resin Composites	<u>4</u>
1.3.5 Disadvantages of Thermoplastic Resin Composites	<u>4</u>
1.4 Applications of Composites to Modern Aircraft, Yachts, Cars, and Trains	<u>5</u>
1.4.1 Early Aircraft Structures	<u>5</u>
1.4.2 Modern Aircraft Structures and Other Applications	<u>5</u>
1.4.3 Projected Use of Composites	<u>5</u>
1.5 Care of Composite Parts	<u>8</u>
1.5.1 Sources of Damage to Composite Parts	<u>8</u>
1.5.1.1 Physical or Chemical Damage	<u>8</u>
1.5.1.2 Deterioration in Normal Service	<u>9</u>
1.5.2 Avoidance of Damage and Reduction of Deterioration in Service	<u>10</u>
References	<u>13</u>

CHAPTER 2

Materials	<u>15</u>
2.1 Fiber Reinforcement	<u>15</u>
2.1.1 Comparison of Some High-Performance Fibers and Common Metals	<u>15</u>
2.1.2 Glass Fiber	<u>16</u>
2.1.2.1 Glass Manufacture	<u>17</u>
2.1.2.2 Glass Fiber Manufacture	<u>20</u>

2.1.3	Carbon Fibers	22
2.1.3.1	Carbon Fiber Manufacture	<u>22</u>
2.1.3.2	Future Development	<u>23</u>
2.1.3.3	Further Details of Carbon and Graphite Fibers	<u>23</u>
2.1.4	Aramid Fibers	27
2.1.5	Boron Fibers	30
2.1.6	Other New Fibers	30
2.2	Forms of Reinforcement	33
2.2.1	Tapes	33
2.2.2	Fabrics	33
2.2.2.1	Woven Fabric Weave Styles	<u>34</u>
2.2.2.2	Effect of Weave Style	<u>35</u>
2.2.2.3	Non-crimp Fabrics	<u>37</u>
2.2.2.4	Nonwoven Randomly Oriented Mats	<u>37</u>
2.2.2.5	Fiber and Fabric Glossary	<u>39</u>
2.3	Fiber Sizing and Finish	40
2.3.1	Glass Fiber Finishes	40
2.3.2	Carbon Fiber Finishes	43
2.3.3	Aramid Fiber Finishes	44
2.3.4	Sizing and Finish for New Types of Fibers and Fabrics	44
2.4	Matrix (Resin) Systems	44
2.4.1	Thermoplastic Composites	45
2.4.1.1	Early Applications	<u>45</u>
2.4.2	Thermosetting Resins	46
2.4.3	Properties Required of Matrix Resins and Adhesives	50
2.4.3.1	Physical and Chemical Properties	<u>50</u>
2.4.3.2	Mechanical Properties	<u>51</u>
2.4.3.3	Epoxy-Based Matrix Resins and Adhesives for Aerospace Use	<u>52</u>
2.4.4	Epoxy and Phenolic Pre-pregs and Film Adhesives: Curing Stages	53
2.4.5	Mixing and Mix Ratios for Epoxy Wet Resins	55
2.4.5.1	Weighing	<u>55</u>
2.4.5.2	Mixing	<u>56</u>
2.4.5.3	Definitions Related to Mixing and Application	<u>56</u>
2.4.6	Polyester Resins	57
2.5	Adhesives	58
2.5.1	Liquid and Paste Adhesives	58
2.5.2	Foaming Adhesives	59
2.5.3	Film Adhesives	60
2.5.4	Glue-Line Thickness Control	62
2.5.5	In-Service Effects on Resin Systems	65

2.6 Core Materials	66
2.6.1 Wood	68
2.6.2 Foam Core Materials	68
2.6.2.1 Material Types	68
2.6.2.2 Foam Density	70
2.6.2.3 Advantages and Disadvantages	70
2.6.3 Honeycomb Core Materials	70
2.6.3.1 Honeycomb Material Types	72
2.6.3.2 Cell Shapes	75
2.6.3.3 Honeycomb Densities and Cell Sizes	75
2.6.4 Fluted Core	76
2.6.5 Syntactic Core	77
2.7 Syntactic Foams and Potting Compounds	77
2.7.1 Filler Materials for Potting Compounds, Resin Systems, and Adhesives	79
2.7.2 Other Fillers	79
2.8 Protective Coatings	80
2.8.1 Sealants	80
2.8.1.1 Old-Generation Thiokol Sealants	82
2.8.1.2 New-Generation Polythioether Sealants	82
2.8.1.3 Silicone Sealants	83
2.8.1.4 Viton Rubber Sealants	83
2.8.2 Primers	83
2.8.3 Finishes	84
2.8.4 Conductive Coatings	86
2.8.5 Erosion-Resistant Coatings	87
2.8.6 Other Protective Coatings	88
References	88
Bibliography	90

CHAPTER 3

Handling and Storage	93
3.1 Shipping and Receiving	93
3.2 Temperature Requirements	93
3.3 Storage Practices	94
3.3.1 Temperature Requirements	94
3.3.1.1 Dry Fabrics	94
3.3.1.2 Storage of Pre-preg, Film, and Paste Adhesives, Potting Compounds, and Primers	94
3.3.1.2.1 <i>Thermoplastic Resins and Their Composites</i>	95

3.3.1.3	Storage of Sealants for Aircraft Use	<u>95</u>
3.3.1.4	Storage of Consumable Items for Composite and Bonded Metal Repairs	<u>96</u>
3.3.2	Cleanliness and Damage Prevention	<u>96</u>
3.3.3	Moisture Damage Prevention	<u>97</u>
3.3.4	Identification	<u>98</u>
3.3.5	Release Notes and Approved Certificates	<u>99</u>
3.4	Shelf Life/Out-Time	<u>101</u>
3.5	Kitting	<u>102</u>
3.6	Recertification	<u>102</u>
3.7	Care of Materials in the Hangar or Workshop	<u>103</u>

CHAPTER 4

Manufacturing Techniques 105

4.1	Filament Winding	<u>105</u>
4.2	Lay-Up Methods for Fabrics and Tapes	<u>107</u>
4.2.1	Hand Lay-Up (Wet and Pre-preg Laminating)	<u>107</u>
4.2.2	Automated Lay-Up	<u>108</u>
4.3	Pultrusion	<u>109</u>
4.4	Resin Transfer Molding	<u>110</u>
4.5	Injection Molding	<u>111</u>
4.6	Tow Placement	<u>113</u>
4.7	Press Molding	<u>114</u>
4.8	Vacuum Bonding	<u>114</u>
4.9	Autoclave Bonding	<u>114</u>
4.10	Oven Curing	<u>118</u>
	References	<u>118</u>
	Other Useful Reading	<u>118</u>

CHAPTER 5

Original Design Criteria 119

5.1	Principal, Primary, and Secondary Structures	<u>119</u>
5.1.1	Sources of Damage to Composite Airframe Components	<u>122</u>
5.1.2	Consequences of Failure	<u>123</u>
5.2	Types of Composite Structures	<u>123</u>
5.2.1	Monolithic Laminated Structures (Solid Laminates)	<u>123</u>
5.2.2	Sandwich Structures	<u>125</u>

5.3 Ply Orientation	<u>128</u>
5.3.1 Warp Clock	<u>128</u>
5.3.2 Balance and Symmetry	<u>130</u>
5.3.3 Nesting and Stacking	<u>133</u>
5.4 Core Orientation and Other Design Characteristics	<u>134</u>
5.5 Operational Environment	<u>134</u>
5.5.1 Temperature	<u>135</u>
5.5.2 Humidity	<u>135</u>
5.5.3 Contaminants	<u>135</u>
5.5.4 Erosion	<u>136</u>
5.5.5 Thermal Stresses	<u>137</u>
5.5.6 Hygrothermal Effects	<u>137</u>
5.5.7 Fire Resistance	<u>137</u>
5.6 Electrical Requirements	<u>138</u>
5.6.1 Galvanic Corrosion	<u>139</u>
5.6.2 Electromagnetic Interference	<u>141</u>
5.6.3 Electrostatic Discharge	<u>142</u>
5.6.4 Lightning Strike Energy Dispersion	<u>143</u>
5.6.5 Radar Transmissivity	<u>143</u>
5.7 Mechanical Requirements	<u>144</u>
5.7.1 Tensile and Flexural Strength	<u>144</u>
5.7.2 Stiffness	<u>145</u>
5.7.3 Fatigue	<u>145</u>
5.7.4 Impact Resistance	<u>147</u>
5.7.5 Creep	<u>148</u>
5.8 Attachments/Joints	<u>149</u>
5.8.1 Bonded Joints	<u>149</u>
5.8.2 Mechanically Fastened/Riveted Joints	<u>153</u>
5.9 Other Design Requirements	<u>154</u>
5.9.1 Aerodynamic Smoothness	<u>154</u>
5.9.2 Weight and Balance	<u>154</u>
References	<u>154</u>

CHAPTER 6

Safety and Environment	<u>157</u>
6.1 Introduction	<u>157</u>
6.2 Workshop Conditions for Good Bonding	<u>160</u>
6.3 Respirable Fibers and Dust	<u>162</u>
6.3.1 Fiberglass	<u>162</u>
6.3.2 Carbon and Graphite Fibers	<u>162</u>

6.3.3	Aramid Fibers	<u>162</u>
6.3.4	Sanding Dust	<u>163</u>
6.4	Fumes and Vapors	<u>163</u>
6.4.1	Resin Fumes	<u>163</u>
6.4.2	Solvent Vapors	<u>164</u>
6.4.3	Sealant Vapors	<u>165</u>
6.4.4	Coatings	<u>165</u>
6.4.5	Fuel	<u>165</u>
6.4.6	Acid Fumes and Splash	<u>165</u>
6.4.7	Exposure Limits	<u>166</u>
6.5	Skin Contact	<u>166</u>
6.5.1	Fibers in Contact with the Skin	<u>166</u>
6.5.2	Resins in Contact with the Skin	<u>167</u>
6.5.3	Solvents in Contact with the Skin	<u>168</u>
6.5.4	Selection of Suitable Gloves	<u>168</u>
6.5.5	Skin Creams for Personal Protection	<u>169</u>
6.6	Material Safety Data Sheets	<u>169</u>
6.7	Exothermic Reactions	<u>169</u>
6.8	Waste Disposal	<u>170</u>
6.9	Safety Procedures	<u>171</u>
6.9.1	Emergency Action First-Aid Procedures	<u>171</u>
6.9.2	General Safety Procedures	<u>171</u>
6.9.3	Personal Safety Precautions	<u>172</u>
6.9.4	Dermatitis	<u>173</u>
6.10	Action in the Event of a Chemical Spillage	<u>175</u>
6.11	Explosion Risk	<u>175</u>
6.12	Static Discharge and Fire Prevention	<u>176</u>
6.12.1	Static Discharge Prevention	<u>176</u>
6.12.2	Fire Prevention	<u>176</u>
6.13	Safety Requirements for Electrical Appliances	<u>177</u>
6.14	ISO Environmental Management Standards	<u>178</u>
	References	<u>179</u>
	Bibliography	<u>180</u>

CHAPTER 7

	Damage and Repair Assessment	<u>181</u>
7.1	Visual Inspection	<u>182</u>
7.2	Tap Test	<u>187</u>
7.3	Ultrasonic Inspection	<u>189</u>
7.4	X-Ray Methods	<u>197</u>

7.5	Eddy Current Inspection	<u>198</u>
7.6	Thermography	<u>199</u>
7.7	Bond Testers	<u>200</u>
7.8	Moisture Meters	<u>200</u>
7.9	Drying of Composites Prior to Repair	<u>202</u>
7.10	Interferometry/Shearography	<u>203</u>
7.11	Damage Types	<u>206</u>
7.12	Sources of Mechanical Damage	<u>208</u>
7.13	Damage Mapping	<u>209</u>
7.13.1	Assessment of Damage Significance	<u>210</u>
	References	<u>215</u>

CHAPTER 8

	Source Documents	<u>217</u>
8.1	Revision Systems	<u>218</u>
8.2	Effectivity	<u>218</u>
8.3	Drawing Numbering Systems	<u>219</u>
8.4	Internal Documents	<u>220</u>
8.5	Material and Process Specifications	<u>221</u>
8.6	Original Equipment Manufacturer Documents	<u>223</u>
8.7	Regulatory Documents	<u>224</u>
8.8	Airlines for America (formerly Air Transport Association of America) ATA 100 System	<u>225</u>
8.9	Aircraft Maintenance Manual	<u>225</u>
8.10	Component Maintenance Manual	<u>225</u>
8.11	Overhaul Manual	<u>226</u>
8.12	Illustrated Parts Catalog	<u>226</u>
8.13	Structural Repair Manual	<u>226</u>
8.14	Engine Manual	<u>227</u>

CHAPTER 9

	Structural Repair Manual (SRM) Repair Method Selection	<u>229</u>
9.1	Component Identification	<u>229</u>
9.2	Damage Classification	<u>230</u>
9.2.1	Damage Terminology	<u>230</u>
9.2.2	Critical Areas	<u>231</u>
9.2.3	Allowable/Negligible Damage	<u>231</u>
9.2.4	Repairable Damage	<u>231</u>

9.2.5	Overhaul or Replace	<u>232</u>
9.2.6	Other Considerations	<u>233</u>
9.3	Repair Methods	<u>234</u>
9.3.1	Speedtape	<u>234</u>
9.3.2	Resin Sealing	<u>234</u>
9.3.3	Potted Repairs	<u>234</u>
9.3.4	Bolted Doublers (Metal Plates) and Bonded Doublers (Composite Patches)	<u>235</u>
9.3.5	Pre-cured Doublers Versus Co-cured Doublers	<u>235</u>
9.3.6	Room-Temperature Wet Lay-Up	<u>236</u>
9.3.7	Elevated-Temperature Wet Lay-Up	<u>237</u>
9.3.8	Pre-preg Repairs	<u>237</u>
9.3.9	Scarfed and Stepped-Lap Repairs	<u>238</u>
9.3.10	Composite Repairs to Metals	<u>239</u>
	References	<u>240</u>

CHAPTER 10

	Repair Techniques	<u>241</u>
10.1	Preparation	<u>241</u>
10.1.1	Paint Removal	<u>244</u>
10.1.2	Disbonding Methods	<u>245</u>
10.1.2.1	Disbonding Adhesively Bonded Metal Parts	<u>245</u>
10.1.2.2	Disbonding Composite Parts	<u>247</u>
10.1.3	Damage Removal	<u>248</u>
10.1.3.1	Damage Removal from Metal Parts	<u>248</u>
10.1.3.2	Removal of Skin and Doubler Material	<u>249</u>
10.1.3.3	Damage Removal from Composite Parts	<u>250</u>
10.1.3.4	Removal of Core Material	<u>250</u>
10.1.3.5	Removal of Surface Corrosion	<u>250</u>
10.1.4	Moisture and Contamination Removal	<u>251</u>
10.1.5	Surface Preparation of Composites: Repair Sanding and Ply Determination	<u>251</u>
10.1.5.1	Abrading	<u>252</u>
10.1.5.2	Taper Sanding/Scarfig	<u>253</u>
10.1.5.3	Step Sanding and Cutting	<u>253</u>
10.1.6	Water Break Test	<u>255</u>
10.1.7	Metallic Surface Preparation	<u>255</u>
10.2	Typical Repairs	<u>257</u>
10.2.1	Edge Band Repairs	<u>257</u>
10.2.2	Repair of Damage to Core and One Skin	<u>257</u>
10.2.3	Repair of Damage to Core and Both Skins	<u>257</u>
10.2.4	Hybrid Repairs	<u>259</u>

10.2.5 Blind Repairs	<u>259</u>
10.2.6 Injected Repairs	<u>265</u>
10.2.7 Solid Laminate Repairs	<u>266</u>
10.2.8 Potted Repairs	<u>266</u>
10.2.9 Metal-to-Metal Bonding	<u>267</u>
10.2.10 Plastic Welding (Solvent or Heat)	<u>268</u>
10.3 Adhesive Usage	<u>268</u>
10.4 Bagging Materials, Release Films, Release Fabrics, Peel Plies, Breather Cloths, Bleeder Cloths, Bleed-Out Fabrics, and Application Techniques	<u>268</u>
10.4.1 Terminology	<u>268</u>
10.4.2 Selection Criteria	<u>271</u>
10.4.3 Surface Versus Envelope Bagging	<u>272</u>
10.4.4 Pleating	<u>274</u>
10.4.5 Bagging Sequence	<u>274</u>
10.4.6 Vacuum Requirements and Principles	<u>274</u>
10.4.6.1 Vacuum Bonding	<u>274</u>
10.4.6.2 Application of Vacuum Pressure to Plates and Assemblies Using Nonperforated Honeycomb	<u>275</u>
10.4.6.3 Practical Techniques to Ensure Adequate Applied Vacuum Pressure to Parts under Repair	<u>277</u>
10.4.7 Caul Plate and Dam Usage	<u>281</u>
10.4.8 Vertical Bleed Method	<u>282</u>
10.4.9 Squeeze-Out (Edge Bleed-Out) Method	<u>283</u>
10.4.10 Zero-Bleed Method	<u>284</u>
10.4.11 Ply Compaction and Debulking	<u>284</u>
10.4.12 Debugging Precautions and Typical Problems	<u>285</u>
10.5 Curing Stages and Temperatures—Heating Techniques	<u>285</u>
10.5.1 Curing Stage Definitions	<u>285</u>
10.5.2 Low-Temperature Cure	<u>286</u>
10.5.3 Elevated-Temperature Cure	<u>286</u>
10.5.4 Direct versus Indirect Heating	<u>286</u>
10.5.5 Ramp Rates and Soak Cycles	<u>287</u>
10.5.6 Temperature Control and Monitoring	<u>287</u>
10.5.7 Thermocouple Placement	<u>287</u>
10.5.8 Temperature Control Problems	<u>289</u>
10.5.9 Hot Bonder and Heater Blanket Usage	<u>290</u>
10.5.10 Heat Sinks	<u>291</u>
10.5.11 Thermocouples	<u>292</u>
10.5.12 Distortion of Parts During Heating or Cooling	<u>293</u>
10.6 Post-Repair Inspection	<u>294</u>
10.7 Surface Restoration	<u>295</u>
References	<u>297</u>

CHAPTER 11**Mechanical Fastening Systems 299**

11.1	Introduction	<u>299</u>
11.2	Fastener Types	<u>300</u>
11.2.1	Fastener Standards	<u>301</u>
11.2.2	Fastener Compatibility	<u>301</u>
11.2.3	Rivets	<u>302</u>
11.2.3.1	Solid Rivets	<u>302</u>
11.2.3.2	Blind Rivets	<u>303</u>
11.2.3.3	Hollow End Rivets	<u>303</u>
11.3	Screws, Nuts, and Bolts	<u>304</u>
11.3.1	Specialty Fasteners (Special Bolts)	<u>306</u>
11.3.2	Lockbolts	<u>306</u>
11.3.3	Hex Drive Bolts	<u>309</u>
11.3.4	Specialty Blind Bolts	<u>312</u>
11.4	Spacers, Bolt Inserts, and Grommets	<u>315</u>
11.5	Hole Preparation	<u>316</u>
11.5.1	Drilling	<u>316</u>
11.5.2	Hole Sizes and Tolerances	<u>318</u>
11.5.3	Edge Distance and Fastener Pitch	<u>320</u>
11.5.4	Hole Protection	<u>321</u>
11.6	Fastener Installation and Removal	<u>321</u>
11.6.1	Fastener Installation	<u>321</u>
11.6.2	Fastener Removal	<u>329</u>
11.7	Fastener Substitution	<u>330</u>
11.8	Bonded Fasteners	<u>330</u>
11.9	Composite Fasteners	<u>331</u>
	References	<u>333</u>

CHAPTER 12**Documentation 335**

12.1	Process Control Documents	<u>335</u>
12.1.1	Cure Chart/Data Strip	<u>336</u>
12.1.2	Routine and Nonroutine Work Documents	<u>336</u>
12.1.2.1	Routine Work Documents	<u>336</u>
12.1.2.2	Nonroutine Work Documents	<u>348</u>
12.1.3	Nondestructive and Destructive Inspection Data	<u>349</u>
12.1.4	Coupon Test Results	<u>350</u>
12.1.5	Clean-Room Temperature and Humidity	<u>350</u>
12.1.6	Return to Service/Logbook Sign-Offs	<u>350</u>

12.2 Calibration Records	351
12.3 Material Control Records	352
12.4 Component Documentation	354
12.5 Training Records	354

CHAPTER 13

Shop Equipment and Hand Tools [357](#)

13.1 Hand Tools and Techniques	357
13.1.1 Drills	358
13.1.2 High-Speed Grinders	359
13.1.3 Cutting Utensils	361
13.1.4 Hand Routers	361
13.1.5 Orbital Sanders	362
13.1.6 Cast Cutter (Oscillating Saw)	362
13.1.7 Painting Equipment	363
13.1.8 Resin Applicators	363
13.2 Shop Equipment	363
13.2.1 Bandsaws	363
13.2.2 Air Compressors	364
13.3 Heating Devices	365
13.4 Measuring Devices	367
13.5 Health and Safety Equipment	368

CHAPTER 14

Tooling and Mold Making [371](#)

14.1 Introduction	371
14.2 Caul Plate and Dam Fabrication	372
14.3 Splash Mold Making	374
14.4 Release Agents/Films	374
14.5 Simple Room-Temperature Tooling	375
14.6 Room-Temperature Curing Pre-Preg Tooling	376
14.6.1 Lay-Up	377
14.6.2 De-bulk Procedure	378
14.6.3 Final Bagging Procedure	379
14.6.4 Autoclave Cure	379
14.6.5 Time Limits	380
14.6.6 Step Post-Curing Procedure After Room-Temperature or Low-Temperature Initial Cure	380

14.6.7	Support Structures	380
14.6.8	Initial Release Priming of New Composite Tools	381
14.6.9	Developments in Low-Temperature Curing Materials	382
	References	382

CHAPTER 15

	Metal Bonding	383
15.1	Introduction	383
15.1.1	History and Requirements	383
15.1.1.1	Metal Bonding	385
15.1.1.2	Epoxy Adhesives	386
15.1.1.3	Requirements for Adhesives	387
15.1.2	Principles of Adhesion	387
15.1.2.1	Adhesion Theory	387
15.1.2.2	Environmental Durability	390
15.1.2.3	Temperature Effects	391
15.1.2.4	Humidity Effects	391
15.1.3	Advantages and Disadvantages of Metal Bonding	391
15.2	Surface Preparation Methods	392
15.2.1	Abrasive Cleaning	395
15.2.2	Semco Pasa-Jell Now Owned by PPG Industries	395
15.2.3	Hydrofluoric Acid Etching	395
15.2.4	Grit Blast/Silane	397
15.2.5	Alodine or Alochrom 1200	397
15.2.6	Sol-Gel Process	399
15.2.7	FPL Etch	399
15.2.8	Chromic Acid Anodizing	400
15.2.9	Phosphoric Acid Anodizing	400
15.2.9.1	Phosphoric Acid Containment System (PACS)	401
15.2.9.2	Phosphoric Acid Non-tank Anodizing (PANTA)	401
15.3	Other Surface Preparations	404
15.4	Primers	404
15.4.1	Reasons for Using Primers	404
15.4.2	Primer Types	405
15.4.3	Application of Primers	405
15.4.4	Curing/Drying	407
15.4.5	Thickness Verification	407
15.5	Handling Primers	407
	References	408
	Bibliography	409

17.4 Bonded Joint Repair Design	<u>474</u>
17.4.1 Introduction to Bonded Joints	<u>474</u>
17.4.2 Types of Bonded Joints	<u>475</u>
17.4.3 Failure Modes of Bonded Joints	<u>477</u>
17.4.4 Adhesive Behavior in Bonded Joints	<u>478</u>
17.4.4.1 Adhesive Shear Stress and Strain	<u>478</u>
17.4.4.2 Elastic and Plastic Adhesive Behavior	<u>479</u>
17.4.4.3 Temperature and Moisture Effects	<u>487</u>
17.4.4.4 Joint Adherend Effects: Stiffness Imbalance and Thermal Mismatch	<u>488</u>
17.4.4.5 Recommended Joint Overlaps and Simplistic Analysis	<u>492</u>
17.4.5 Adhesive Peel Stress and Displacement	<u>494</u>
17.4.6 Durability: Fatigue, Creep, and Environmental Effects	<u>502</u>
17.4.7 Bonded Joint Repair Considerations	<u>504</u>
17.4.8 Bonded Joint Repair Design Recommendations	<u>504</u>
17.5 Mechanically Fastened Joints	<u>505</u>
17.5.1 Introduction to Mechanically Fastened Joints	<u>505</u>
17.5.2 Fastened Laminate Failure Modes	<u>506</u>
17.5.3 Fastener Failure Modes	<u>509</u>
17.5.4 Open-Hole Stress Concentrations: Composites Versus Metals	<u>509</u>
17.5.5 Loading of Mechanically Fastened Joints	<u>510</u>
17.5.6 Loaded Fastener Holes	<u>513</u>
17.5.7 Fastener Load Distribution and Joint Geometry	<u>514</u>
17.5.8 Lay-Up Orientation for Fastened Joints	<u>518</u>
17.5.9 Pad-Ups and Hybrid Material Application	<u>518</u>
17.5.10 Fatigue of Fastened Composite Joints	<u>519</u>
17.5.11 Effects of Gaps and Shims	<u>520</u>
17.5.12 Fastener Selection	<u>521</u>
17.5.13 Mechanically Fastened Repairs in Sandwich Panels	<u>524</u>
17.5.14 Fastened Joint Repair Recommendations	<u>524</u>
