CHAPTER 1

Introduction	1
1.1 Background	1
1.2 Work Objectives	2
1.3 Scope of the Work	2
1.4 Comments on the Project Life Cycle	5
1.5 Parametric Modeling Basics	6
References	6

CHAPTER 2

Fundamentals of Rocket Propulsion	9
2.1 Introduction	9
2.2 The Main References: A Historical Perspective	11
2.3 Parametric Modeling Application Review	14
2.4 What Is Jet Propulsion?	16
2.5 The de Laval Nozzle	17
2.6 Thrust Equation	19
2.7 Standard Atmosphere	20
References	21

CHAPTER 3	
Methodology	25
3.1 Project Flowchart	25
3.2 High-Level Requirements	27
3.3 Combustion Gases Properties	28
3.3.1 Mixture Ratio	28
3.3.2 Adiabatic Flame Temperature	29
3.3.3 Molar Mass	29
3.3.4 Specific Heats Ratio	29
3.3.5 Sources of Data	29
3.4 Propellant Properties	30
3.4.1 Fuels	32
3.4.2 Oxidizers	33
References	34
CHAPTER 4	
Thrust Chamber Performance Assessment	37
4.1 A Parameter for Thrust Chamber Performance Assessment	37
4.2 Conditions for an Ideal Thrust Chamber	39
4.3 Theoretical Performance	40
4.4 Correction Factors	43
4.5 Validations	45
References	47
CHAPTER 5	
Nozzle Dimensioning	49
5.1 Throat Section Dimensioning	49
5.1.1 Throat Section Dimensioning: First Method	50
5.1.2 Throat Section Dimensioning: Second Method	50
5.2 Exhaust Section Dimensioning	51
5.2.1 Exhaust Section Dimensioning: First Method	51
5.2.2 Exhaust Section Dimensioning: Second Method	52

5.3 When Nozzle Operates Out of the Optimal Point	52
5.4 Validations	54
References	56

CHAPTER 6

Combustion Chamber Dimensioning	59
6.1 Introduction	59
6.2 Combustion Chamber Volume	60
6.3 Combustion Chamber Diameter	61
6.4 Combustion Chamber Length	62
6.5 Chamber Wall Thickness	63
6.6 Model Assessment	64
6.7 Validations	66
References	67

CHAPTER 7

Nozzle Configuration	69
7.1 Introduction	69
7.2 Conical Nozzle	71
7.3 Parabolic Nozzle	72
7.4 Validation	78
References	79

CHAPTER 8

Complementing the Performance Calculation	81
8.1 Propellant Consumption	81
8.2 Nozzle Flow Equations	82
8.3 Validations	83
References	85

CHAPTER 9	
The Cold Section	87
9.1 Introduction	87
9.2 Impinging Jets	88
9.3 Shower Head	89
9.4 Swirl, Pressure Swirl, or Spray	90
9.5 Pintle	90
References	91
CHAPTER 10	
The Simplex Swirl Injector	93
10.1 Introduction	93
10.2 Swirl Injection Operation	93
10.3 Problem Statement	95
10.4 The Outlet Orifice	96
10.5 The Inlet Orifices	97
10.6 Sizing Methodology	98
10.7 Validation	100
References	101
CHAPTER 11	
The Pintle Injector	103
11.1 Introduction	103
11.2 General Characteristics	104
11.3 Qualitative Analyses: Flow Visualization	105
11.4 Quantitative Analyses: Design Parameters	108
11.5 Validation	110
11.5.1 The 1000-N Injector	110
11.5.2 Validation: The 5000-N Injector	113
References	115

CHAPTER 12

Appendix	117
12.1 Ground Test	117
12.1.1 Testing a Complete Engine - Hot Test	117
12.1.2 Testing the Propellant Injector - Cold Test	118
12.2 Propellants Charts	120
12.2.1 Liquid Oxygen and Ethanol	121
12.2.2 Liquid Oxygen and Kerosene	123
12.2.3 Liquid Oxygen and Liquid Methane	125
12.2.4 Liquid Oxygen and Liquid Hydrogen	127
12.2.5 Hydrogen Tetroxide and UDMH	129
References	131
About the Author	133
Index	135
