## CHAPTER 1

<b>Introduction to Accident Reconstruction</b>	<b>1</b>
<b>1.1 The Approach Used in Accident Reconstruction</b>	<b>1</b>
1.1.1 The Context of Reconstruction	1
1.1.2 Investigation and Analysis	2
1.1.3 Analysis by Phases	3
1.1.4 Theoretical and Empirical Modeling	3
1.1.5 Uncertainty Analysis	3
1.1.6 Incorporating Witness Statements and Testimony	5
1.1.7 Causation	7
1.1.8 Analyzing Avoidance Scenarios	9
<b>1.2 Physical Principles Used in Accident Reconstruction</b>	<b>10</b>
1.2.1 Conservation of Energy	10
1.2.2 Newton's Second Law and the Principle of Work and Energy	10
1.2.3 Principle of Impulse and Momentum (Conservation of Momentum)	15
<b>References</b>	<b>18</b>

## CHAPTER 2

<b>Overview of Motorcycle Crash Analysis</b>	<b>23</b>
<b>2.1 Motorcycle Types</b>	<b>25</b>
<b>2.2 Motorcycle Dimensions and Inertial Properties</b>	<b>28</b>
<b>2.3 Motorcycle Controls</b>	<b>35</b>
<b>2.4 Motorcycle Tires</b>	<b>35</b>
2.4.1 Motorcycle Tire Markings	36
2.4.2 Motorcycle Tire Friction Coefficients	37
<b>References</b>	<b>39</b>

**CHAPTER 3**

<b>Braking and Acceleration</b>	<b>41</b>
<b>3.1 Motorcyclist Braking and Deceleration Capabilities</b>	<b>42</b>
3.1.1 Motorcycles with Integrated, Linked, and Antilock Braking Systems	48
3.1.2 What Deceleration Can Motorcyclists Be Expected to Achieve?	51
<b>3.2 Motorcycle and Rider Acceleration Capabilities</b>	<b>51</b>
<b>3.3 Determining Speed Based on Gear</b>	<b>52</b>
3.3.1 Case Study: Determining Speed Based on Gear	53
<b>References</b>	<b>55</b>

**CHAPTER 4**

<b>Cornering and Swerving</b>	<b>59</b>
<b>4.1 Analysis of a Motorcycle Traversing a Curve</b>	<b>59</b>
4.1.1 Incorporating Roadway Superelevation	60
4.1.2 Example Lean Angle Calculation	62
4.1.3 Assumptions	62
4.1.4 Case Study: Application of the Lean Angle Equations at the Apex of a Curve	63
4.1.5 Case Study: Application of the Lean Angle Equations in the Time Domain	67
4.1.6 Friction-Limited Speed	71
4.1.7 Geometric Limit on Speed	72
4.1.8 Willingness to Lean	75
<b>4.2 Lane Change, Swerve, and Turn-Away</b>	<b>75</b>
<b>4.3 Crashes Involving Passengers</b>	<b>79</b>
<b>4.4 Additional Data Acquisition Techniques</b>	<b>79</b>
4.4.1 Harry's Lap Timer	79
<b>References</b>	<b>90</b>

**CHAPTER 5**

<b>Physical Evidence from Motorcycle Crashes</b>	<b>93</b>
<b>5.1 Scene Evidence</b>	<b>93</b>
5.1.1 Skid Marks	95
5.1.2 Gouges, Scrapes, Scuffs, and Tire Marks	97
5.1.3 Site Inspection Checklist	98
<b>5.2 Evidence on the Motorcycle</b>	<b>99</b>
5.2.1 Motorcycle Inspection Checklist	101

<b>5.3 Damage to the Struck Vehicle</b>	<b>102</b>
<b>5.4 Evidence Documentation Methods</b>	<b>104</b>
5.4.1 Mapping with LIDAR	104
5.4.2 Photogrammetry	106
5.4.2.1 Camera Reverse Projection	109
5.4.3 Removing Lens Distortion	111
5.4.4 Case Study: Photogrammetric Analysis of Video of a Motorcycle Accident	113
5.4.5 Case Study: Photogrammetric Analysis of Video of Another Motorcycle Accident	119
5.4.6 Image-Based Scanning	122
5.4.7 Mapping with Small Unmanned Aerial Vehicles	127
5.4.8 Incorporating Large-Scale Lidar Data into Photogrammetry	128
<b>References</b>	<b>129</b>

## CHAPTER 6

### Sliding and Tumbling of the Motorcycle and Rider **133**

<b>6.1 Typical Decelerations for a Sliding Motorcycle</b>	<b>133</b>
<b>6.2 Average Decelerations for a Sliding or Tumbling Rider</b>	<b>139</b>
<b>6.3 Determining the Initial Speed for a Sliding Motorcycle or Rider</b>	<b>141</b>
6.3.1 Example Calculation of Motorcycle Speed at Onset of Sliding	141
<b>References</b>	<b>142</b>

## CHAPTER 7

### Motorcycle Falls **145**

<b>7.1 Low-Side Falls</b>	<b>145</b>
7.1.1 Case Study: A Low-Side Fall	146
<b>7.2 High-Side Falls</b>	<b>149</b>
7.2.1 Case Study: A High-Side Fall	150
7.2.2 Case Study: A High-Side Fall	152
<b>7.3 Impact-Induced Capsize</b>	<b>154</b>
<b>7.4 Analyzing the Motion of Projected Riders</b>	<b>154</b>
7.4.1 Collins Model	154
7.4.2 Searle Model	155
7.4.3 Aronberg Model	156
<b>References</b>	<b>158</b>

**CHAPTER 8****Motorcycle Collisions with  
Vehicles and Roadside Barriers 159**

<b>8.1 Analysis Based on Motorcycle Wheelbase Reduction</b>	<b>161</b>
<b>8.2 Determining Motorcycle Speed from the Struck Vehicle Translation and Rotation</b>	<b>174</b>
8.2.1 Case Study: WREX2016, Test #3	175
8.2.2 Case Study: WREX2016, Test #5	176
8.2.3 Case Study: WREX2016, Test #8	177
8.2.4 Case Study: WREX2016, Test #11	178
8.2.5 Case Study: WREX2016, Test #22	179
8.2.6 Case Study: WREX2016, Test #23	180
8.2.7 Case Study: WREX2016, Test #24	181
8.2.8 Discussion of WREX Tests	182
8.2.9 Should the Rider's Weight Be Included?	183
<b>8.3 Impacts into Moving Vehicles</b>	<b>184</b>
<b>8.4 Summary of Motorcycle-to-Car Collision Analysis Methods</b>	<b>186</b>
8.4.1 Speed Analysis Based on Wheelbase Reduction	186
8.4.2 Speed Analysis Based on a Known Translation and Rotation of the Struck Vehicle	186
<b>8.5 Motorcycle Collisions with Roadside Barriers</b>	<b>187</b>
8.5.1 Case Study: Motorcycle-to-Roadside Barrier Crash Tests	189
8.5.1.1 Steel Guardrail: Upright	189
8.5.1.2 Concrete Barrier: Upright	191
8.5.1.3 Modified Steel Guardrail: Upright	191
8.5.1.4 Steel Guardrail: Capsized	192
8.5.1.5 Concrete Barrier: Capsized	192
8.5.1.6 Modified Steel Guardrail: Capsized	192
<b>References</b>	<b>194</b>

**CHAPTER 9****Event Data Recorders in  
Motorcycle Accidents 197**

<b>9.1 Data from the Struck Vehicle</b>	<b>197</b>
9.1.1 Case Study: Utilizing EDR Data from the Struck Vehicle	200
<b>9.2 Data from the Motorcycle</b>	<b>210</b>
9.2.1 Case Study: Video as a Source of Data from the Motorcycle	212
<b>References</b>	<b>214</b>

**CHAPTER 10**

<b>Motorcycle Visibility and Conspicuity</b>	<b>215</b>
<b>10.1 Physical Factors Affecting Visibility</b>	<b>216</b>
10.1.1 The Shape and Size of the Motorcycle	216
10.1.2 Foliage, Signage, and Other Environmental Elements	216
10.1.3 Visibility over Hill Crests	218
10.1.4 Visibility around a Corner	220
<b>10.2 Motorcycle Operation That Affects Visibility</b>	<b>221</b>
10.2.1 Lane Position	221
10.2.2 Maneuvering the Motorcycle within a Lane	222
10.2.3 Headlamp and Brake Modulation	222
<b>10.3 Effectiveness of Daytime Running Lights on Motorcycles</b>	<b>222</b>
<b>References</b>	<b>225</b>

**CHAPTER 11**

<b>Motorcycles at Night</b>	<b>227</b>
<b>11.1 Clothing and Gear Worn by a Motorcyclist</b>	<b>227</b>
<b>11.2 Motorcycle Headlamps and Signal Lighting</b>	<b>230</b>
<b>11.3 Measuring Headlamp Performance</b>	<b>231</b>
<b>11.4 Computer Modeling of Headlamps</b>	<b>239</b>
<b>11.5 Terminology for Nighttime Visibility Analysis</b>	<b>243</b>
<b>References</b>	<b>244</b>

**CHAPTER 12**

<b>Human Factors in Motorcycle Crashes</b>	<b>247</b>
<b>12.1 Why Do Drivers Pull Out in Front of Motorcyclists?</b>	<b>249</b>
<b>12.2 The Perception-Response Process</b>	<b>258</b>
<b>12.3 Motorcyclists' Responses to a Laterally Incurring Vehicle</b>	<b>260</b>
<b>12.4 Motorcyclists' Braking Responses</b>	<b>261</b>
<b>12.5 Are Training and Licensing Effective?</b>	<b>263</b>
<b>12.6 Crash Injury Protection</b>	<b>265</b>
<b>12.7 Group Riding</b>	<b>266</b>
<b>12.8 Passenger Vehicle Driver Capabilities</b>	<b>268</b>
<b>References</b>	<b>269</b>

**CHAPTER 13**

<b>Visualization of Motorcycle Crashes</b>	<b>273</b>
<b>13.1 View from the Motorcyclist's Perspective</b>	<b>273</b>
13.1.1 Mounting Equipment on the Motorcycle	273
13.1.2 Mounting Equipment on the Operator	274
13.1.3 Mounting Equipment on Another Vehicle	275
<b>13.2 View of the Motorcycle from Other Vehicles</b>	<b>277</b>
<b>13.3 Camera Setup and Representing a Driver's View</b>	<b>280</b>
13.3.1 Camera Height	280
13.3.2 Field of View	282
13.3.3 Scaling the Images for Playback	284
<b>13.4 Computer Visualization of a Motorcycle Crash</b>	<b>284</b>
13.4.1 Case Study: Visualization of a Nighttime Scenario	287
13.4.2 Case Study: Computer-Generated Visualization of a Truck Versus Motorcycle Crash	299
<b>References</b>	<b>309</b>
