

Contents

Acknowledgements	<u>ix</u>
Preface	<u>xi</u>
A Note on Units	<u>xiii</u>
Introduction	<u>xv</u>
About this Book	<u>xxi</u>

CHAPTER 1

Tire Construction and Terminology	<u>1</u>
Construction Terminology	<u>3</u>
Tire Dimensions and Properties	<u>8</u>
Inflation Pressure	<u>14</u>
Tire Temperatures	<u>18</u>
Tire Classification	<u>23</u>
Selection Between Bias and Radial Tires	<u>24</u>
Manufacturing, Certification, and Standardization	<u>26</u>
Tire Sizing	<u>28</u>
Tire Sizing Formulae	<u>28</u>
Tire Sizing Requirements	<u>30</u>
Tire Tables	<u>31</u>

CHAPTER 2

Tire Performance and Modeling	<u>53</u>
Mechanics of Pneumatic Tires	<u>53</u>
Rolling Behavior	<u>54</u>
Turning Behavior	<u>55</u>
Vertical Stiffness	<u>58</u>
Braking Behavior	<u>59</u>
Tire-Ground Friction	<u>63</u>
Wet Runways and Hydroplaning	<u>65</u>
Snow and Ice	<u>72</u>

Wear	<u>73</u>
Tire Property and Behavior Models	<u>75</u>
Nasa Technical Report R-64	<u>75</u>
Brush Model and Fiala Model	<u>76</u>
Beam and String Models	<u>77</u>
Magic Formula Model	<u>78</u>
CHAPTER 3	
Undesirable Tire Behavior	<u>81</u>
Spray	<u>81</u>
Debris Lofting	<u>86</u>
Tire Failure Modes	<u>90</u>
Modeling Tire Failure Events	<u>94</u>
Model 1: Tire Debris Threat Model	<u>95</u>
Model 3E: Flailing Tire Strip Threat Model	<u>96</u>
Model 3R: Flailing Tire Strip Threat Model	<u>96</u>
Model 4: Tire Burst Pressure Effect Threat Model	<u>97</u>
Understanding the Impact of Tire Failures	<u>101</u>
References	<u>105</u>
Index	<u>109</u>
