Preface xix

CHAPTER 1

Introduction	<u>1</u>
1.1. What Is Finite Element Analysis?	<u>1</u>
1.2. What Is the Place of FEA among Other Tools of Computer-Aided Engineering?	<u>2</u>
1.3. Fields of Application of FEA and Mechanism Analysis	<u>2</u>
1.4. Fields of Application of FEA and CFD	<u>4</u>
1.5. What Is “FEA for Design Engineers”?	<u>4</u>
1.6. Note on Hands-On Exercises	<u>5</u>

CHAPTER 2

From CAD Model to Results of FEA	<u>7</u>
2.1. Formulation of the Mathematical Model	<u>7</u>
2.2. Selecting the Numerical Method to Solve the Mathematical Model	<u>10</u>
2.2.1. Selected Numerical Methods in CAE	<u>10</u>
2.2.2. Reasons for the Dominance of FEM	<u>10</u>
2.3. FEA Model	<u>11</u>
2.3.1. Meshing	<u>11</u>
2.3.2. Formulation of FE Equations	<u>12</u>
2.3.3. Errors in FEA Results	<u>13</u>
2.4. Verification and Validation of FEA Results	<u>14</u>

CHAPTER 3

Fundamental Concepts of FEA	<u>17</u>
3.1. Formulation of a Finite Element	<u>17</u>
3.1.1. Closer Look at Finite Element	<u>17</u>
3.1.2. Requirements to be Satisfied by Displacement Interpolation Function	<u>20</u>
3.1.3. Artificial Restraints	<u>20</u>
3.2. Choices of Discretization	<u>22</u>
3.3. Types of Finite Elements	<u>23</u>
3.3.1. Element Dimensionality	<u>23</u>
3.3.2. Element Shape	<u>28</u>
3.3.3. Element Order and Element Type	<u>29</u>
3.3.4. Summary of Commonly Used Elements	<u>30</u>
3.3.5. Element Modeling Capabilities	<u>31</u>

CHAPTER 4

Controlling Discretization Errors	<u>33</u>
4.1. Presenting Stress Results	<u>34</u>
4.2. Types of Convergence Analysis	<u>36</u>
4.2.1. h Convergence by Global Mesh Refinement	<u>36</u>
4.2.2. h Convergence by Local Mesh Refinement	<u>40</u>
4.2.3. Adaptive h Convergence	<u>42</u>
4.2.4. p Convergence Process	<u>44</u>
4.2.5. Choice of Convergence Process	<u>46</u>
4.3. Discretization Error	<u>46</u>
4.3.1. Convergence Error	<u>47</u>
4.3.2. Solution Error	<u>47</u>
4.4. Problems with Convergence	<u>48</u>
4.4.1. Stress Singularity	<u>48</u>
4.4.2. Displacement Singularity	<u>54</u>
4.5. Hands-On Exercises	<u>58</u>
4.5.1. HOLLOW PLATE	<u>58</u>
Description	<u>58</u>
Objective	<u>58</u>
Procedure	<u>59</u>
4.5.2. L BRACKET01	<u>60</u>
Description	<u>60</u>
Objective	<u>60</u>
Procedure	<u>60</u>

4.5.3. WEDGE	61
Description	61
Objective	61
Procedure	61

CHAPTER 5

Finite Element Mesh [65](#)

5.1. Meshing Techniques	65
5.1.1. Manual Meshing	65
5.1.2. Semi-automatic Meshing	66
5.1.3. Automatic Meshing	67
5.2. Mesh Compatibility	69
5.2.1. Compatible Elements	70
5.2.2. Incompatible Elements	70
5.2.3. Forced Compatibility	71
5.3. Common Meshing Problems	73
5.3.1. Element Distortion	73
5.3.2. Mesh Adequacy	75
5.3.3. Element Mapping to Geometry	76
5.3.4. Incorrect Conversion to Shell Model	78
5.4. Hands-On Exercises	79
5.4.1. BRACKET01	79
Description	79
Objective	79
Procedure	79
5.4.2. CANTILEVER	80
Description	80
Objective	80
Procedure	80

CHAPTER 6

Modeling Process [83](#)

6.1. Modeling Steps	84
6.1.1. Definition of the Objective of Analysis	84
6.1.2. Selection of the Units of Measurement	84
6.1.3. Geometry Preparation	85
6.1.4. Defining Material Properties	85
6.1.5. Defining Boundary Conditions	86

6.2. Selected Modeling Techniques	<u>87</u>
6.2.1. Mirror Symmetry and Anti-symmetry Boundary Conditions	<u>87</u>
6.2.2. Axial Symmetry	<u>92</u>
6.2.3. Cyclic Symmetry	<u>92</u>
6.2.4. Realignment of Degrees of Freedom	<u>94</u>
6.2.5. Using Point Restraints to Eliminate Rigid Body Motions	<u>95</u>
6.3. Hands-On Exercises	<u>96</u>
6.3.1. BRACKET02—Mirror Symmetry BC	<u>96</u>
Description	<u>96</u>
Objective	<u>96</u>
Procedure	<u>96</u>
6.3.2. BRACKET02—Anti-symmetry BC	<u>97</u>
Description	<u>97</u>
Objective	<u>97</u>
Procedure	<u>97</u>
6.3.3. BRACKET02—Mirror Symmetry and Anti-symmetry BC	<u>98</u>
Description	<u>98</u>
Objective	<u>98</u>
Procedure	<u>98</u>
6.3.4. SHAFT01	<u>99</u>
Description	<u>99</u>
Objective	<u>99</u>
Procedure	<u>99</u>
6.3.5. PRESSURE TANK	<u>100</u>
Description	<u>100</u>
Objective	<u>100</u>
Procedure	<u>100</u>
6.3.6. RING	<u>101</u>
Description	<u>101</u>
Objective	<u>101</u>
Procedure	<u>101</u>
6.3.7. LINK01	<u>102</u>
Description	<u>102</u>
Objective	<u>102</u>
Procedure	<u>103</u>

CHAPTER 7

Nonlinear Geometry Analysis 105

7.1. Classification of Different Types of Nonlinearities	<u>105</u>
7.2. Geometric Nonlinearity	<u>106</u>

7.3. Membrane Stress Stiffening	<u>112</u>
7.4. Contact	<u>117</u>
7.5. Hands-On Exercises	<u>122</u>
7.5.1. CANTILEVER BEAM	<u>122</u>
Description	<u>122</u>
Objective	<u>123</u>
Procedure	<u>123</u>
7.5.2. SHAFT02	<u>123</u>
Description	<u>123</u>
Objective	<u>123</u>
Procedure	<u>123</u>
7.5.3. ROUND PLATE01	<u>123</u>
Description	<u>123</u>
Objective	<u>124</u>
Procedure	<u>124</u>
7.5.4. LINK02	<u>124</u>
Description	<u>124</u>
Objective	<u>124</u>
Procedure	<u>124</u>
7.5.5. SLIDING SUPPORT	<u>125</u>
Description	<u>125</u>
Objective	<u>125</u>
Procedure	<u>125</u>
7.5.6. CLAMP01	<u>125</u>
Description	<u>125</u>
Objective	<u>125</u>
Procedure	<u>125</u>
7.5.7. CLAMP02	<u>126</u>
Description	<u>126</u>
Objective	<u>126</u>
Procedure	<u>126</u>

CHAPTER 8

Nonlinear Material Analysis	<u>129</u>
8.1. Review of Nonlinear Material Models	<u>129</u>
8.2. Use of Nonlinear Material to Control Stress Singularity	<u>132</u>
8.3. Other Types of Nonlinearities	<u>134</u>
8.4. Hands-On Exercises	<u>134</u>
8.4.1. BRACKET NL	<u>134</u>
Objective	<u>135</u>

Procedure	135
8.4.2. L BRACKET02	135
Description	135
Objective	135
Procedure	135

CHAPTER 9

Modal Analysis	139
9.1. Differences between Modal and Static Analysis	139
9.2. Interpretation of Displacement and Stress Results in Modal Analysis	140
9.3. Modal Analysis with Rigid Body Motions	141
9.4. Importance of Supports in Modal Analysis	143
9.5. Applications of Modal Analysis	144
9.5.1. Finding Modal Frequencies and Associated Shapes of Vibration	144
9.5.2. Locating “Weak Spots” in Structure	145
9.5.3. Modal Analysis Provides Input to Vibration Analysis	146
9.6. Pre-stress Modal Analysis	146
9.7. Symmetry and Anti-symmetry Boundary Conditions in Modal Analysis	148
9.8. Convergence of Modal Frequencies	149
9.9. Meshing Consideration for Modal Analysis	150
9.10. Hands-On Exercises	150
9.10.1. TUNING FORK	150
Description	150
Objective	150
Procedure	150
Comments	150
9.10.2. BOX	151
Description	151
Objective	151
Procedure	151
Comments	151
9.10.3. AIRPLANE	151
Description	151
Objective	151
Procedure	151
Comments	152

9.10.4. BALL	152
Description	<u>152</u>
Objective	<u>152</u>
Procedure	<u>152</u>
Comments	<u>152</u>
9.10.5. LINK03	152
Description	<u>152</u>
Objective	<u>152</u>
Procedure	<u>152</u>
Comments	<u>153</u>
9.10.6. HELICOPTER BLADE	153
Description	<u>153</u>
Objective	<u>153</u>
Procedure	<u>153</u>
Comments	<u>153</u>
9.10.7. COLUMN	154
Description	<u>154</u>
Objective	<u>154</u>
Procedure	<u>154</u>
Comments	<u>155</u>
9.10.8. BRACKET03	155
Description	<u>155</u>
Objective	<u>155</u>
Procedure	<u>155</u>
Comments	<u>156</u>

CHAPTER 10

Buckling Analysis 159

10.1. Linear Buckling Analysis	<u>160</u>
10.2. Convergence of Results in Linear Buckling Analysis	<u>163</u>
10.3. Nonlinear Buckling Analysis	<u>163</u>
10.4. Controlling an Onset of Buckling in Nonlinear Buckling Analysis	<u>174</u>
10.5. Summary	<u>175</u>
10.6. Hands-On Exercises	<u>176</u>
10.6.1. NOTCHED COLUMN - Free End	<u>176</u>
Description	<u>176</u>
Objective	<u>176</u>
Procedure	<u>176</u>
Comments	<u>177</u>

10.6.2. NOTCHED COLUMN - Sliding End	177
Procedure	177
10.6.3. ROUND PLATE02	177
Description	177
Objective	177
Procedure	177
Comments	178
10.6.4. CURVED COLUMN	178
Objective	178
10.6.5. STAND	178
Description	178
Objective	178
Procedure	178
Comments	179
10.6.6. CURVED SHEET	179
Description	179
Objective	179
Procedure	179

CHAPTER 11

Vibration Analysis [181](#)

11.1. Modal Superposition Method	181
11.2. Time Response Analysis	183
11.3. Frequency Response Analysis	186
11.4. Nonlinear Vibration Analysis	190
11.5. Hands-On Exercises	192
11.5.1. HAMMER - Impulse Load	192
Description	192
Objective	192
Procedure	192
Comments	193
11.5.2. HAMMER - Beating	193
Description	193
Objective	193
Procedure	193
Comments	194
11.5.3. ELBOW PIPE	194
Description	194
Objective	194
Procedure	194
Comments	194

11.5.4. CENTRIFUGE	<u>194</u>
Description	<u>194</u>
Objective	<u>195</u>
Procedure	<u>195</u>
Comments	<u>195</u>
11.5.5. PLANK	<u>195</u>
Description	<u>195</u>
Objective	<u>195</u>
Procedure	<u>195</u>
Comments	<u>196</u>

CHAPTER 12

Thermal Analysis	<u>199</u>
12.1. Heat Flow by Conduction	<u>200</u>
12.2. Heat Flow by Convection	<u>201</u>
12.3. Heat Transfer by Radiation	<u>203</u>
12.4. Modeling Considerations in Thermal Analysis	<u>204</u>
12.5. Challenges in Thermal Analysis	<u>206</u>
12.6. Hands-On Exercises	<u>207</u>
12.6.1. BRACKET04	<u>207</u>
Description	<u>207</u>
Objective	<u>207</u>
Procedure	<u>207</u>
Comments	<u>207</u>
12.6.2. HEAT SINK	<u>207</u>
Description	<u>207</u>
Objective	<u>207</u>
Procedure	<u>207</u>
Comments	<u>208</u>
12.6.3. CHANNEL	<u>208</u>
Description	<u>208</u>
Objective	<u>208</u>
Procedure	<u>208</u>
Comments	<u>208</u>
12.6.4. SPACE HEATER	<u>209</u>
Description	<u>209</u>
Objective	<u>209</u>
Procedure	<u>209</u>
Comments	<u>209</u>

CHAPTER 13

Implementation of Finite Element Analysis in the Design Process	<u>211</u>
13.1. Differences between CAD and FEA Geometry	<u>211</u>
13.1.1. Defeaturing	<u>212</u>
13.1.2. Idealization	<u>213</u>
13.1.3. Cleanup	<u>214</u>
13.2. Common Meshing Problems	<u>216</u>
13.3. Mesh Adequacy	<u>218</u>
13.4. Integration of CAD and FEA Programs	<u>219</u>
13.4.1. Stand-Alone FEA Programs	<u>219</u>
13.4.2. FEA Programs Integrated with CAD	<u>219</u>
13.4.3. Computer Aided Engineering (CAE) Programs	<u>219</u>
13.5. FEA Implementation	<u>220</u>
13.5.1. Positioning of CAD and FEA Activities	<u>220</u>
13.5.2. Personnel Training	<u>221</u>
13.5.3. FEA Program Selection	<u>223</u>
13.5.4. Hardware Selection	<u>225</u>
13.5.5. Building Confidence in FEA	<u>225</u>
13.5.6. Return on Investment	<u>226</u>
13.6. FEA Project	<u>226</u>
13.6.1. Before FEA Project Starts	<u>227</u>
13.6.2. Establish the Scope of Analysis	<u>227</u>
13.6.3. Create the Mathematical Model	<u>227</u>
13.6.4. Create the Finite Element Model and Solve It	<u>228</u>
13.6.5. Review the Results	<u>228</u>
13.6.6. Presentation of the Results	<u>229</u>
13.6.7. FEA Report	<u>230</u>
13.6.8. Project Documentation and Backups	<u>231</u>
13.6.9. Contracting Out FEA Services	<u>231</u>
13.6.10. Common Errors in Management of FEA Projects	<u>232</u>

CHAPTER 14

Summary	<u>235</u>
14.1. FEA Quiz	<u>235</u>
14.2. Frequently Asked Questions	<u>238</u>

CHAPTER 15

FEA Resources [249](#)

CHAPTER 16

Glossary [253](#)

CHAPTER 17

List of Exercises [259](#)
