

# Automotive TELEMATICS

**An Introduction into the Technical Aspects  
of Automotive Telematics with  
Reference to Business Model and User Needs**

## **Table of Contents:**

**Executive Summary**

**Chapter 1 Introduction**

**Chapter 2 Value Chain and Business  
Model**

**Chapter 3 Telematics System View**

End-to- End System  
In-Vehicle System  
Back-End Infrastructure

**Chapter 4 Enabling Technologies**

Positioning and Location Technologies  
Telematics Services Delivery  
Technologies  
Networking and Protocols  
Vehicle Communications  
Audio and Speech Processing  
Distributed Computing

**Chapter 5 Services and Applications**

Communications  
Convenience  
Floating Car Data (FCD)  
Customer Relationship Management  
(CRM)  
Product Feedback  
Productivity-Asset Status Update  
Infotainment  
Safety and Security

**Chapter 6 Telematics Products**

Broadcast Systems  
Two-Way Communications Systems  
Safety and Security Systems  
Fleet Management Systems  
Connected Infotainment Systems

**Chapter 7 Challenges and Future  
Research**

Driver Distraction and Human-Machine  
Interface (HMI)  
Life-Cycle Disparity  
Communication Networks  
Distributed Applications  
Telematics-Assisted Safety Systems
