

Electronic

CONTROL SYSTEMS

Table of Contents:

Chapter 1 Types of Electronic Control Systems

Chapter 2 Trends

- Networks
- Algorithm Complexity
- Safety Critical/Fault-Tolerant Operation
- Electronic Memory Types
- Power Consumption
- Electromagnetic Compatibility (EMC)
- Smart Sensors
- Microcontroller CPU Trends
- Packaging Trends

Chapter 3 Technologies

- Drivers of Technology Innovation
- Semiconductor Technology
- Electronic Control Unit (ECU) Technology
- Technology Innovation Driving System Innovation
- Automated Highway
- Sensor Implementation
- System Chips and Technology Partitioning

Chapter 4 Vehicular Networks

- Motivation to Network
- Different Types of Networks
- Fault-Tolerant Networking

Chapter 5 Challenges

- Cost Reduction
- Supplier Relationships
- Custom Requirements of the Automotive Industry
- Development Time
- The Sensor Explosion

Chapter 6 Software

- Cost
- Reusability
- Electronic Design Automation
- Code Compression
- Quality

Chapter 7 The Future

- Changes in Systems: By-Wire
- Changes in Components: Digital Signal Controller (DSC)
- Competitive Advantage in Electronic Control Systems
