# Table of Contents

**Introduction** ................................................................................................................................. vii

**Design Features of the 747-400 Electric Power System (892227)** ................................................. 1  
Jim Thom and John Flick, Sundstrand Corporation

Gary Abusamra, Rob Carpenter, and Stephen Kiselewich, Delphi Corporation

Song You and Laci Jalics, Delphi Corporation

**Vehicle Level Approach for Optimization of On-Board Diagnostic Strategies for Fault Management (2013-01-0957)** .................................................................................... 31  
Dibyendu Palai, Tata Motors Ltd.

**A Hierarchical Reasoning Structure to Support Aerospace IVHM (2011-01-2665)** ................................................................. 47  
Michael Roemer, Impact Technologies LLC

**Solid State Power Control as a Network Backbone for Aircraft System Health Management (2012-01-2233)** ........................................................................................................ 55  
Michael Ballas and Fred Potter, Astronics Corp.

**Integration Issues for Vehicle Level Distributed Diagnostic reasoners (2013-01-2294)** .............................................................................................................................. 65  
Faisal Khan, Cranfield University; Ian Jennions, IVHM Centre Cranfield University; and Tarapong Sreenuch, Cranfield University

Tarapong Sreenuch and Ian Jennions, IVHM Centre Cranfield University

**Health Ready Components—Unlocking the Potential of IVHM (2016-01-0075) ..... 85**  
Steven Holland, General Motors Company; Tim Felke, Honeywell Aerospace; Luis Hernandez, Global Strategic Solutions LLC; Robab Safa-Bakhsh, Boeing Research & Technology; and Matthew A. Wuensch, Honeywell
