About the Editor

John E. Blyler is vice president, chief content officer for Extensionmedia, which includes brands such as Chip Design, Solid State Technology, Embedded Intel, RF-Microwave Systems, and others. He is a frequent guest on ChipEstimate TV, where he covers technology trends and intellectual property issues. John was the senior editor for Penton’s Wireless Systems Design magazine and, before that, an associate editor for the IEEE I&M magazine. He has co-authored several books on systems engineering and RF technology for Wiley and Elsevier. John has over 23 years of systems engineering hardware-software experience in the electronics industry—including work at the DoD, within the semiconductor private sector, and at software start-up companies. He remains an affiliate professor of graduate-level systems engineering at Portland State University. Mr. Blyler holds a BS in engineering physics from Oregon State University, as well as an MSEE from California State University, Northridge.
