INDEX

Advanced LP Systems, Inc., 300
After-market vehicle conversions, 36
   CARB certification of kit for, 194
   engine efficiency in mechanical conversions, 44-50
Air flowrate, formula for, 82
Air pollution, in optimized compressed natural gas conversion system, 110
Air pollution, and need for alternative fuels, 3-7, 10-11
Alcohol fuels
   burning, in compression ignition engines, 140-141
   in conversion of spark ignition engines, 114-115
   effect of, on volumetric efficiency, 20
Algas Carburetion, 299, 300
Algas Industries, 300
Alternative fuel(s)
   advantages over gasoline and diesel fuel, 9-11
   air/fuel ratios of, 31-32
   air pollution and need for, 3-7, 10-11
   air quality improvement by, 37
   cetane rating of, 35
   clean, 185
   cost effectiveness of, 38-40
   definition of, 188
   energy content of, relative to gasoline and diesel fuel, 32-33
   fuels considered as, 8-9, 29-30
   heat of vaporization of, 34
   loss in volumetric efficiency from, 33-34
   lower heating value of, 32
   octane rating of, 35, 36
   outlook for, 6-8
   public support for, 30
   vehicle range of, 32
Alternative fuel conversion hardware, effect of, on volumetric efficiency, 20-21
Alternative fuel conversion systems, use of, 75
Alternative fuel fleet evaluation program, performance of conversion vehicles, 45-50
Alternative fuel system cost analysis, 212-213
   annual operating costs, 229-230
   annual savings, 231
   initial costs
compressors, 219-220
facility design, 214-219
facility instrumentation and controls, 222-223
facility site preparation, building, and utilities, 225
fuel dispensing equipment, 224
fuel tanks, 220-222
land, 213-214
maintenance, 228
moisture control equipment, 223-224
training and documentation, 225
vehicle conversions, 225-227, 228, 229

Alternative fuel vehicle (AFV)
definition of, 188
estimated emissions from, 7
purchase requirements
electric vehicle provisions, 192
incentives, 192-193
private and municipal fleet, 190, 191
related requirements and exemptions, 190, 192
state fleet, 190, 191

Annual payment or receipt, calculating present worth of, 206-207
ANSI Standard (NGV-1), requirements of, 84
Antiknock rating, 35
ASME storage tanks, versus DOT cascades storage tanks, 155
Automobile emission standards, 37-38
Automotive Natural Gas, Inc. (ANGI), 299, 300
Auto/Oil Air Quality Improvement Research Program, 4, 32

Beacon Power Systems, 299
Beam Products Manufacturing Co., 299, 300
Bluebird, 50
Bobtail, 160
Boost recirculation system, 103-104, 105
Borg Warner Corp., Marvel Schieber/Tillotson Division, 301
Brake horsepower (bhp), 14
Brake mean effective pressure (BMEP), calculation of, 15
Brake specific fuel consumption (BSFC), 15
map for compression ignition engine, 19
map for spark ignition engine, 18
as result of turbocharging on, 23-24
Bulkhead, 160
Bus fleet. See School bus fleet
Bus project, to promote commercial use of alternative fuels, 192-193
Bush, George, 164

California Air Resources Board (CARB), 57
  certification of after-market alternative fuel conversion kits, 194
  certification of dual-fuel conversion systems by, 139
  certification of liquid petroleum gas systems by, 57
  clean fuel vehicle pilot program in, 187
  designations for transitional low vehicle, 37, 194
  designations for ultra-low emission vehicle, 37, 194
  low emission vehicle standards developed by, 4, 37
  vendors with approved conversion kits, 88, 299-301
CARB Phase II RFG requirements, 71
Carbon monoxide, national ambient levels of, 6
Carbon monoxide emissions, for natural gas engines, 44
Carburetion Labs, 299, 300
Carburetted systems, versus electronic injection, 85-86
Cash flow, and cost analysis, 204-206
Caterpillar, 50
  conversion of engine to dual-fuel operation, 135-137, 138, 139
Century Products, 299
Cetane number of fuel, 22, 35
Cetane ratings, comparison of octane ratings and, 21
Chassis dynamometer testing, 46-47, 97-102
Cherco Compressors, Incorporated, 283
Chevrolet
  chassis dynamometer testing of Caprice model, 46-47, 98-99
  development of alternative fuel engines by, 37, 54
  FTP testing of liquid petroleum gas conversions for Lumina model, 99-102
  optimized methanol conversion of Corsica model, 115-121
Chrysler Canada, development of alternative fuel engines by, 29, 54
Chrysler Corporation
  alternative fuel vehicles developed by, 37
  work on battery technology by, 66
Clean Air Act (CAA) (1970), 163, 164
Clean Air Act Amendments (CAAA) (1990), 3, 70, 164, 165-187
  time line for implementation dates, 180
  Title I—provisions for attainment and maintenance of national ambient air quality standards
    general planning requirements, 166
    non-attainment areas, 167-175, 176
    state implementation plans, 166
  Title II—provisions relating to mobile sources, 185-187
    clean fuels and clean-fuel vehicles, 185-187
    fuel specifications and requirements, 177, 179-184
vehicle emission standards, 175, 177, 178
Clean alternative fuels, 185
Clean diesel fuel, 9, 126, 185, 188
Clean fuel, purchase implementation dates, 186
Clean vehicles
   credits for purchasing, 186-187
   exhaust emissions criteria for, 185
Clinton, Bill, 193
CO non-attainment areas
   classification of, 175, 176
   control periods for, 182
Colt Industries Operating Corp., Holley Replacement Parts Div., 300
Compressed natural gas (CNG), 4, 40
   advantage of, over liquefied natural gas, 51
   refueling facilities for, 52-53
      costs of, 214-217
   refueling receptacles for, 84
   storage tanks for, 51-52
Compressed natural gas (CNG) compressors, equipment suppliers for, 303
Compressed natural gas (CNG) conversion
   of Chevrolet Caprice, 98-99
   cost analysis for school bus fleet, 231-238
   of Ford cid engine, 93-97
   of GMC 350 cid engine, 89-93
   optimized, for 1991 GMC pickup, 102-114, 115, 116
Compressed natural gas (CNG) conversion kits, vendors with California Air
   Resources Board approval, 299-301
Compressed natural gas (CNG) conversion systems
   chassis dynamometer testing of, 97-102
   emission standards for, 88
   engine dynamometer testing of, 88-97
Compressed natural gas (CNG) conversion vehicles, cost of, 226
Compressed natural gas (CNG) fuel dispensers, cost of, 224
Compressed natural gas (CNG) fuel storage tanks, cost of, 220
Compressed natural gas (CNG) moisture control equipment, costs for, 223-224
Compressed natural gas (CNG) refueling equipment
   ASME versus DOT cascade assemblies, 155
   compressors, 149-152
   crack growth in, 155-156
   dispensers, 157
   fuel storage tanks, 153-156
   moisture removal equipment, 147-149
   priority valve system, 152-153
requirements for, 145, 146
schematic layout of refueling station, 146
sequential and dome loading valve panels, 156-157
typical facilities for, 147
Compressed natural gas (CNG) refueling facilities
background on, 277-278
cost analysis of, 287-291
cost of instrumentation and control equipment, 222
description of, 278-282
fast-fill computer program for, 295-297
final configuration, 292, 293
fluid system components
compressor, 282-283
dome load valve system, 285
excess flow check valve, 286-287
fast fill storage, 283-284
fill posts, 284-285
priority valve system, 285-286
sequential valve system, 286
recommendations, 292, 294-295
Compressed natural gas (CNG) storage tanks, compressibility factor in, 153-154
Compressibility factor, for compressed natural gas, 153-154
Compression ignition (CI) engine, 13, 14
brake specific fuel consumption map for, 19
burning of alternative fuels in, 22-23
control systems on, 25-26
conversion of, 49-50, 123-141
  burning alcohol fuels in, 140-141
  burning gaseous fuels in, 127-128
    dedicated fuel operation, 128-133
    dual-fuel operation: fumigation in, 133
  engine exhaust emissions, 125-127
  factors affecting alternative fuel use in compression ignition engines, 123-125
volumetric efficiency for, 34
Compression ratio of engine, and engine efficiency, 21-22
Compressors
  in compressed natural gas refueling system, 149-152, 282-283
cost analysis for, 219-220
  suppliers of compressed natural gas, 303
Computer data acquisition systems, 26
Computer program, development of fast-fill program, 295-297
Consolidated metropolitan statistical area (CMSA), 166
Consumer Price Index (CPI), 210, 211
Coors Brewing Co., 63
Corporate Average Fuel Economy (CAFE), 164, 165
Cost analysis, 197-198
   for alternative fuel systems, 212-213
   cash flow, 204-206
   of compressed natural gas refueling facility design, 287-291
   cost categories, 192-201
   depreciation and taxes, 209
   equivalency and time value of money, 203-204
   inflation and deflation, 210-211
   interest, 202-203
   internal rate of return analysis, 207-208
   life-cycle, 211-212
   payback period, 208-209
   present worth analysis, 206-207
Cost categories
   direct, 200, 201
   first, 198
   fixed, 199-200
   incremental or marginal, 200-201
   indirect, 200, 201
   operations and maintenance, 198-199
   recurring and non-recurring, 201
   sunk, 201
   variable, 200
Costs, future, in alternative fuel system cost analysis, 229-230
Covered fleet, vehicles exempt from, 189
Crack growth, in compressed natural gas storage tanks, 155-156
Crane Carrier, 50
Crude oil, nation’s dependence on, and alternative fuels, 9-10
Cummins, 50

Dedicated gaseous fuel operation, modifying compression ignition engines for,
   128-133
Dedicated natural gas engine
   combustion chamber configuration for, 130
   emissions from, 130
Deflation, and cost analysis, 210-211
Depreciation, in cost analysis, 209
Detroit Diesel Corporation, 50
   Series 50G dedicated natural gas engine, 129
   transit bus engine of, 140
Dew point of gas, 53
Diaphragm regulator, 83
Diesel engine. See Compression ignition (CI) engine
Diesel fuel
   characteristics of concern, 1
   energy content of, 33
