Index

Page numbers followed by an f or t indicate figures or tables, respectively.

Administration expenses, 42
Air-based attributes and performance, 188
Auctions
  definitions and laws, 102–103
  drawbacks to use, 101
Automatic transmissions and performance, 189
Awarding a bid. See Bid award process
Axle ratio selection for medium and heavy vehicles, 215–218, 216f, 217f

Bid analysis
  bid process overview, 18–20
  commercial specification evaluation, 251–252
  data gathering, 245–246
  low vs. high bids evaluation, 247, 248
  maintenance cost inclusion, 254
  matrix analysis, 252–253, 254–255
  price evaluation, 252
  replacement decision revisited, 246–248
  request for quotes, 249–250
  technical specification evaluation, 250–251
  vendor evaluation
    company evaluation, 258–260
    factors involved, 255
    overall rating, 261
    product evaluation, 260–261
    quality assessment, 256–258

Bid award process
  final payment terms and, 24
  finalizing specifications and costs, 263
  manufacturing and assembly process coordination, 20

289
Bid award process (continued)
  negotiation, 264–265
  pre-build meeting, 265, 267, 267f
  testing verification, 265, 266f
  timetable agreement, 265
  warranty expectations, 264
Bid solicitation for functional specifications
  costs to bid, 230
  fleet extension decision, 270–271
  inspection process and dates notification, 227
  latent defects provision, 230
  liquidating damages provision, 228
  pre-bid conference, 225–226
  specification preparation and, 157, 158
  standard terms and conditions
    bid invitation, 231
    fixed price contract, 236–237
    instructions to bidders, 232–233
    performance schedule, 235
    price proposal form, 235
    proposal form, 234
    scope of work, 238–242
    timetable of deliveries definition, 226
    warranty expectations, 228–229
Birth certificate information, 144, 147–148f
Budget planning
  fleet cost determination, 10, 12–14
  inventory example, 10, 11t
  needs and resources considerations, 5–6
  objectivity need, 7–10
  sizes and classifications use, 10, 12t
  timing considerations, 14
  two-year cycle process, 6–7
  utilization accounting, 14–15, 16–17t, 18
Building equipment life-cycle chart, 93–94
Buyback agreements, 103

Cab and chassis types, 199–200
Cab design and performance, 188
Capital expenditures
  cost analysis, 124–130
Capital expenditures (continued)
  cost of borrowing money, 37–38, 38f
  financing options, 36
  per-vehicle costs tracking, 38
Car and light vehicle specifications
  format example, 172f
  life-cycle cost overview, 175, 175–176f, 177
  life-cycle costing example, 84–87
  life-cycle review and analysis, 178–181, 179–181f
  new-vehicle purchase considerations, 171–174, 173f
  old vs. new cost comparison, 177–178
  specification construction, 182, 182–183f, 184
  see also Specification preparation
Chassis specification example, 139–143
Chassis types, 200f
Classifications of expenses, 39–40
Classifications for vehicles, 12t
Clearing account concept, 13
Clutch fans and performance, 187
Clutch torque limit calculations, 221–223
Consignment sales for vehicle disposal, 106
Cost analysis. See Economics of vehicle replacement; Life-cycle costing; Vehicle utilization from a cost perspective
Crankcase heater and performance, 189
Cruise control and performance, 190

Delivery acceptance
  final acceptance conditions, 273, 274f
  in-service inspection process, 272–273
  inspection at delivery, 271
  payment initiation, 273
  pre-finalization considerations, 269–270
  warranties and (see Warranties)
Depreciation
  defined, 34–36, 41
  in total unit costs analysis, 74–76, 74f, 75f
Diesel engines
  fuel efficiency and, 187, 189–190
  gasoline engines vs., 192–193, 194f

John E. Dolce is an active fleet manager, consultant, author, and industrial instructor with more than 35 years of experience in car, truck, transit, mining, and equipment maintenance and operations. His background includes public and private fleets ranging from 100 to 18,000 vehicles with 24-hour, 7-day multishop and multistate operating locations. Mr. Dolce has helped thousands of management individuals and companies in the public and private sectors to implement cost efficiencies nationally and internationally during the past 30 years.

Mr. Dolce earned an A.A.S. in auto and diesel technology from the State University of New York, Farmingdale, Long Island. He also earned a B.S. and an M.A. in industrial management, both from New York University, New York City. Since 1966, Mr. Dolce has worked as Operations Manager—Truck Training School for Rentar Educational Corporation in Long Island City, New York; Assistant Chief Engineer Fleet for Royal Globe Insurance Company in New York City; Director of Personnel, Safety, and Security for Wooster Express, Inc. in Windsor, Connecticut; Fleet Manager of 3,000 vehicles at the U.S. Postal Service in Newark, New Jersey; Fleet Manager of 5,500 vehicles for General Public Utilities in Parsippany, New Jersey; Vice President of Transit Maintenance for 400 transit buses for Liberty Lines, Inc. in Yonkers, New York; Vehicle and Facility Project Manager for Baker Engineering for five maintenance facilities, alternative-fuel equipped; Vice President and General Manager of Mail Contractors of America in Little Rock, Arkansas, for 1,800 vehicles; and Director Fleet Management Division for Essex County in Newark, New Jersey, for 1,000 vehicles.
In addition to his current role as an active fleet manager and a private consultant, Mr. Dolce teaches seminars in fleet and facility management nationally and internationally for George Washington University, the University of Washington at Seattle, and the Society of Automotive Engineers (SAE). He also teaches fleet management in the undergraduate and graduate programs at the City University and the State University of New York.

Mr. Dolce is a Trustee of the Equipment Managers Council of America, is active with the Association of Equipment Personnel and National Private Truck Council in their certification programs, and is on the Board of Directors of International Fleet Management, Inc. He is an SAE member and serves on various SAE committees. Other books authored by Mr. Dolce include Analytical Fleet Maintenance Management and Fleet Management.
