Dedication

This compendium is dedicated to four individuals who were instrumental in the creation, development, and implementation of racing safety research:

Gary Dickinson (1938–2000)

John Pierce (1936–2009)

Steve Peterson (1950–2008)

Sid Watkins (1928–2012)

Table of Contents

Acknowledgments	ix
Introduction.....	1
Technical Papers	5
Biomechanical Performance of a New Head and Neck Support (902312) Hubbard, R. P. and Begeman, P. C.	5
Racing Car Restraint System Frontal Crash Performance Testing (942482) Melvin, J. W., Little, W. C., et al.	15
Development of the HANS Head and Neck Support for Formula One (983060) Gramling, H., Hodgman, P., and Hubbard, R.	23
Biomechanical Analysis of Indy Race Car Crashes (983161) Melvin, J. W., Baron, K. J., et al.	29
Barrier Testing (983061) Wright, P., and Mellor, A.	49
Development and Field Performance of Indy Race Car Head Impact Padding (2001-22-0019) Melvin, J. W., Bock, H., et al.	61
Sled Test Evaluation of Racecar Head/Neck Restraints – Revisited (2004-01-3516) Melvin, J. W., Begeman, P. C., and Foster, C. D.	83
Biomechanical Principles of Racecar Seat Design for Side Impact Protection (2004-01-3515) Melvin, J. W., and Gideon, T. W.	97
Race Car Nets for the Control of Neck Forces in Side Impacts (2004-01-3513) Gideon, T. W., Melvin, J., and Begeman, P.	107
Initial In-Service Performance Evaluation of the SAFER Racetrack Barrier (2004-01-3526) Bielenberg, R., Faller, R., et al.	117
Crash Protection of Stock Car Racing Drivers – Application of Biomechanical Analysis of Indy Car Crash Research (2006-22-0016) Melvin, J. W., Begeman, P. C., et al.	129

Stock Car Racing Driver Restraint – Development and Implementation of Seat Performance Specification (2008-01-2974) Patalak, J. P., and Melvin, J. W.	143
Examination of a Properly Restrained Motorsport Occupant (2013-01-0804) Patalak, J. P., Gideon, T. W., and Melvin, J. W.....	151
About the Editors	169

Acknowledgments

Much of the work presented in this compendium is the result of significant support of those conducting the research by a number of individuals and their organizations. We would like to acknowledge the following individuals and their organizations.

Gary Dickinson, GM vice president of Technical Staffs, who, in 1992, recognized the need for better driver protection and had the insight to involve both GM Motorsports and GM Research Laboratories in a multidisciplinary approach to the problem.

Herb Fishel, director of GM Motorsports (retired), who provided manpower and support for racing safety research while at GM and continues to be a strong advocate for driver safety.

John Pierce, GM Motorsports, whose insights into the inner workings of motorsports and his knowledge of the best way to proceed allowed researchers to interface smoothly and successfully with racers and their teams.

Jim Hall, Chaparral Cars, who provided his state-of-the-art racecars for the fitting and evaluation of the first accident data recorders (ADRs) used in motorsports competition. His patience, understanding, and support were instrumental in the research that provided the basis for the current use of ADRs in racecars.

Steve Peterson, NASCAR R&D Center, director of safety, for his skill at implementing the necessary technical improvements to make NASCAR's drivers among the safest in the world.

Sid Watkins, M.D., a pioneer in racing safety and trackside medicine, who, in 2004, formed the FIA Institute for Motorsports Safety and led significant efforts in racing safety research.

SAE International Motorsports Engineering Conference and Exhibition—These meetings, with origins in the mid 1980s, became the international forum for academia, industry, and competitors to share motorsports technology data and opinion. Motorsports safety was a leading component of these conferences.
