This presentation provides an overview of the IAQG Private Web utilizing the SAE Standards Works software. The site supports the International Aerospace Quality Group (IAQG) and provides you with access to IAQG technical committees and ballots for which you have approved access.

From this website, you can access specific committee related pages such as committee document list, works in progress list, ballots, rosters and email.

Your access to this website is part of your professional association with SAE, the IAQG and its subsidiary bodies and its contents shall be handled with the appropriate discretion. If you are in question of any of the content, please contact the appropriate IAQG Team Leader for assistance.
Accessing the IAQG Private Web

From the IAQG public site www.iaqg.org
Click on the “Members Only” link
User name and password required.

SAE Standard Works is utilized to store IAQG team work product along with the IAQG Operating Management System. Access to SAE Standard Works is limited to members and can be obtained through your sectors.

http://www.sae.org/servlets/works/logout.do

After entering your user name and password, select “Remember Me” from your own computer. Click Login.
When viewing “My Committees”, choose IAQG to enter the IAQG Private Web.

You can also follow other links to:
• Your Sector page,
• The SAE G-14 AAQSC page and the
• RMC’s public page if you have been provided access.

If you have voting rights on standards, follow this link to review and vote on the standard.

Be sure to sign up for daily email alerts so you know when content has been added or revised.

You can also access:
• Your Sector page,
• The G-14 AAQSC page and the
• RMC’s public page from these links.
1. **My Committees** – this provides easy access to move between committee Home Pages.

2. **My Tasks** – this is a listing of all open ballots that require a response/vote, along with the date the ballot will close. Each task will disappear once the vote is submitted or required action taken.

3. **Quick Links** – general information sites on the SAE Home Page and your link to Logout.

4. **Overview** – this is an expandable link that provides information on the scope of the committee.

5. **Resources** – this section contains standards reference tools and may also include committee specific information.

6. **Upcoming Meetings** – this section will contain all future meeting information, including agendas and registration.

7. **Minutes** – minutes for the past five-years will be available in this section.
Works in Progress (WIP) Tab

The Works in Progress (WIP) tab is not used
The Documents tab is not used
The IAQG Operating Management System is located in "Committee Work Area" tab.
The Committee Work Area is where we collaborate using a collection of Folders, Files and Discussion Topics relevant to committee activity.

Members have the ability to add folders, upload files and create discussion threads.

No Technical report/document related work should be posted in this area.
The IAQG Roster is the IAQG Roster.

By clicking the hyperlinks at the top of each column, you can sort by role, company and role alphabetically by clicking on that column heading.

You can print this roster and you can also create an e-mail distribution list from here.

The IAQG Roster is for professional communications and will not be shared outside groups or vendors.
The Ballots tab is not used for the IAQQ page but is used for the G-14 page if you are a member of the IAQSC and have voting rights on the standards.
The e-mail feature is restricted to only IAQG official communication and should not be used as for personal communications. Additionally, it is utilized for announcements from IAQG leadership or Team Leaders.

There are several options where you can send e-mail:

- To the entire membership,
- To the membership excluding a mailing list, or
- To select individuals only.

The e-mail feature supports attachments.
If you are a member of the SAE G14, AAQSC Group, follow this link to review and vote on standards. Note that the date shown is the date the standard ballot closes.
1. Review the document summary

4. If you plan to add comments, indicate the section/paragraph

5. Select if the comment is technical or informational

6. Input your comments

8. Submit your vote. If you wish to change your vote, you can re-access the ballot and change your vote.
Delegated Product Release Verification

Scope
This standard specifies requirements for DPRV to establish common product/service requirements for use at all levels of the supply chain. This standard shall apply when an organization elects to delegate product release verification to their supplier to perform product acceptance on their behalf. The delegating organization shall use this standard as the baseline for establishing a DPRV process, although they may include additional requirements to meet their specific needs. Where required, the supplier shall comply with this standard as well as any additional requirements imposed by the delegating organization.

Rationale
The process for Delegated Product Release Verification (DPRV) varies from one organization to another. Implementation of a standard process reduces the risk of scope in the aviation, space, and defense industry supply chains when the customer's product release verification has been delegated to a supplier.
