What can we do to support you?

A survey will be sent to each aerospace and defence company.

Open a discussion in your company and share your feedback and need with us.

IAEG® Members:
Are you ready for Materials Declaration?
PREPARE YOUR ORGANIZATION

Evaluate

How do my current data acquisition and management processes align with IPC-1754 materials declaration?

- What adjustments are needed to implement the data exchange process?
- Are all key stakeholders engaged (e.g., supply chain, engineering, legal, etc.)

What level of commitment is needed from my organization to implement the materials declaration process?

How will this impact my suppliers?

How will my company manage the supplier data in an efficient way?

Demonstrate

How do I engage my customer-base to ensure we continue to meet their needs?

- Have I made my internal stakeholders aware?
- Am I protected with appropriate terms & conditions or other contractual language?

Communicate

Who needs to understand this change?

- How will the availability of support resources be promoted? (external/internal - training, information, technical support, etc.)
